

FRONT HEADRESTS

To raise the headrest

Pull the headrest upwards to the desired height.

To lower the headrest

Press button 2 and guide the headrest down to the desired height.

To adjust the angle of the headrest

Depending on the vehicle, tilt section A towards or away from you to the required position.

To remove the headrest

Raise the headrest to its highest position (tilt the seatback backwards if necessary). Press button 1 and lift the headrest to release it.

To refit the headrest

Pull out the headrest rods 3 as far as possible by pulling from the top. Take care to ensure they are clean and correctly aligned and, if there are any problems, check that the notches are facing forwards.

Insert the headrest rods into the holes (tilt the seatback backwards if necessary).

Lower the headrest until it locks, press button 1 and lower the headrest as far as possible.

Check that each headrest rod 3 is securely locked in the seatback by trying to pull them up or push them down.

The three upper positions can be manipulated without pressing button 2. However, it is preferable to press this button to lower the headrest.

The headrest is an important safety component: ensure that it is in place and in the correct position. The distance between your head and the headrest and the distance between the head and section A should be as small as possible.
