way which was congruent with their own interests From subservient economic agents they became the drivers of economic adjustment Through this case study of readjustment in France this book offers a subtle critique of neo institutionalist perspectives on firms Institutional frameworks do not simply offer scenarios for adjustment but are themselves constructions of economic and political actors and therefore subject to change and reorganization By analysing how large firms in France arguably one of the least likely places to harbour such endogenous capacities changed their institutional environment to fit their own needs this book offers an important new perspective on the political economy of industrial and economic change
