Autopia Peter Wollen, Joe Kerr, 2002 The reach of the car today is almost universal and its effect on landscapes cityscapes cultures indeed on the very fabric of the modern world is profound Cars have brought benefits to individuals in terms of mobility and expanded horizons but the cost has been very high in terms of damage to the environment and the consumption of precious resources Despite the growing belief that a Faustian price is now being paid for the freedom cars have bestowed on us we are none the less manufacturing them in ever greater numbers Autopia is the first book to explore the culture of the motor car in the widest possible sense Featuring newly commissioned essays by writers critics historians artists and film makers as well as reprinting key texts it examines the effect of the car throughout the world including the USA Western and Eastern Europe Japan China Cuba India and South Africa In this book the car is treated neither as a technological fetish object nor as an instrument of danger Instead it is examined as a hugely important determinant of 20th century culture neither wholly good nor an unmitigated disaster and certainly endlessly fascinating Contributors include Michael Bracewell Ziauddin Sardar Al Rees Martin Pawley Donald Richie and Peter Hamilton Key texts by Marshall Berman Jane Jacobs Roland Barthes Marc Auge and others

Suicide Voices Sarah Waters, 2020-09-01 This book examines the phenomenon of work suicides in France and asks why at the present historical juncture conditions of work can push individuals to take their own lives During the 2000s France experienced what commentators have described as a suicide epidemic whereby increasing numbers of workers in the face of extreme pressures of work chose to kill themselves The book analyses a corpus of testimonial material linked to 66 suicide cases across three large French companies during the period from 2005 to 2015 It aims to consider what the extreme and subjective act of self killing narrated in suicide letters can tell us about the contemporary economic order and its impact on flesh and blood bodies What do rising work related suicides reveal about conditions of human labour in the

twenty first century Does neoliberal economics condition a desire for suicide How do suicidal individuals describe the causes and motivations of their act Combining critical perspectives from sociology history testimony studies economics cultural studies and public health the book raises critical questions about the human costs of the shift to a finance driven neoliberal order and its everyday effects within the French workplace Libros españoles en venta, ISBN ,1995 Renault Clio Petrol and Diesel 05-09 Owners Workshop Manual M.
