Deborah M. Mission and Evangelism in a Secularizing World Narry F. Santos, Mark Naylor, 2019-02-14 Secularization as a movement away from a religious orientation to life is strong in Canada and has influence worldwide In this volume missiologists and practitioners across Canada consider how an agenda of Christian mission and evangelism can be advanced in a secularizing environment How can believers be curious and engaged rather than defensive and fearful What changes are required from the evangelical community so that there is productive dialogue and action in ways that maintain faithfulness to the cause of Christ What should the approach of mission be to a new generation steeped in secular narratives How do we answer negative caricatures of Christian mission in light of the history of Residential Schools What examples from the past teach us about developing an irenic approach What positive trends are currently evident in Canada and around the world that counter the secularizing narrative These questions and more are considered in this volume by Canadian scholars who recognize the importance of being relevant to society while maintaining integrity with the Gospel message The essays address secularism in Canadian and worldwide contexts with seriousness insight and an underlying theme of hope recognizing that God s mission has been accomplished is being accomplished and will be accomplished *Religion and Sport in North America* Jeffrey Scholes, Randall Balmer, 2022-09-13 From athletes praising God to pastors using sport metaphors in the pulpit the association between sport and religion in North America is often considered incidental Yet

religion and sport have been tightly intertwined for millennia and continue to inform shape and critique one another. Moreover, sport rather than being a solely secular activity is one of the most important sites for debates over gender, race, capitalism, the media, and civil religion. Traditionally, scholarly writings on religion and sport have focused on the question of whether sport is a religion, using historical, philosophical, theological, and sociological insights to argue this matter. While these efforts sought to answer an important question, contemporary issues related to sports were neglected, such as globalization, commercialization, feminism, masculinity, critical race theory, and the ethics of doping. This volume contains lively up-to-date essays from leading figures in the field to fill this scholarly gap. It treats religion as an indispensable prism through which to view sports and vice versa. This book is ideal for students approaching the topic of religion and sport. It will also be of interest to scholars studying sociology of religion, sociology of sport, religion and race, religion and gender, religion and politics, and sport in general.

Crisis, Controversy and the Future of Religious Education L. Philip Barnes, 2019-12-05. *Crisis, Controversy and the Future of Religious Education* sets out to provide a much needed critical examination of recent writings that consider and respond to the crisis in religious education and more widely to a crisis in non-confessional forms of religious education wherever practised. The book is critical, wide-ranging and provocative, giving attention to a range of responses, some limited to the particular situation of religious education in England and some of wider application, for example that of the role and significance of human rights and that of the relevance of religious studies and theology to religious education. It engages with a variety of positions and with recent influential reports that make recommendations on the future direction of religious education. Constructively, it defends both confessional and non-confessional religious education and endorses the existing right of parental withdrawal. Controversially, it concludes that the case for including non-religious worldviews in religious education and for the introduction of a statutory objective national religious education curriculum for all schools are both unconvincing on educational, philosophical and evidential grounds. Timely and captivating, this book is a must-read for religious and theological educators, RE advisers, classroom teachers, student teachers and those interested in the field of religious education.

Freedom of Religious Organizations Jane Calderwood Norton, 2016-08-12. Religious freedom is now widely accepted as fundamental to any liberal democracy. It is recognised in domestic, regional and international human rights instruments and its importance is lauded by philosophers, lawyers, judges, clergy and even politicians. While it is easy to support religious freedom in the abstract, tensions can arise between the activities of religious organizations and the law that challenge this general commitment to religious freedom. Should religious organizations be permitted to discriminate against women or gay people in their employment practices when admitting members or in providing goods and services? Should the courts interfere in these organizations to protect the interests of a disaffected member or to resolve internal property disputes? Should the state allow religious tribunals to determine or advise on family matters? While much has been written about religious individuals and the law, there has been a discernible lack of literature on organizations and the law. Jane

Norton fills this gap with *Freedom of Religious Organizations* By exploring potential conflicts between the law and religious organizations and examining whether the current British response to such conflicts is justified this book will consider when English law ought to apply to religious organizations and how these conflicts should be dealt with *Metacognition, Worldviews and Religious Education* Shirley Larkin, Rob Freathy, Jonathan Doney, Giles Freathy, 2019-07-03 Religious Education RE holds a unique place within the state education system Yet the teaching of RE has often been criticised for its tendency to present simplified and stereotypical representations of religions Bringing together the theory of metacognition with RE curriculum content this book offers a coherent and theoretically supported approach to RE and beyond that is applicable to a range of subjects and students of various age groups *Metacognition Worldviews and Religious Education* seeks to support teachers in creating a new and exciting classroom approach With a focus on putting children and teachers worldviews back on the RE agenda and developing awareness of these through metacognitive processes it includes Tables frameworks and checklists to make it easy for teachers to adapt the approach to their own context Concrete examples of how the approach can work in the classroom including case studies from teachers Call out boxes for teachers and others to reflect on their own practice and to consider their own beliefs and values in relation to teaching and learning Co authored by three researchers from Exeter University and one experienced advanced skills RE primary school teacher this book explains in a jargon free way the theories of metacognition and worldviews which underpin the creation of a unique learning environment making it an essential read for students experienced teachers researchers in RE and anyone interested in taking a thinking skills approach to pedagogy *Religion Online* August E. Grant, Amanda F. C. Sturgill, Chiung Hwang Chen, Daniel A. Stout, 2019-03-07 *Religion Online* provides new insights about religiosity in a contemporary context offering a comprehensive look at the intersection of digital media faith communities and practices of all sorts Recent research on Apple users video games virtual worlds artificial intelligence digital music and sports as religion supports the idea that media and religion once considered separate entities are in many cases the same thing New media and religious practice can no longer be detached this two volume set discusses how religionists are embracing the Internet amidst cultural shifts of secularization autonomous religious worship millennials affinity for new media and the rise of fundamentalism in the global south While other works describe case studies this book explains how new media are interwoven into the very fabric of religious belief behavior and community Chapters break down the past present and projected future of the use of digital media in relation to faith traditions of many varieties extending from mainline Christianity to new religious movements The book also examines the impacts of digital media on beliefs and practices around the world In exploring these subjects it calls on the study of culture namely anthropology to conceptualize a technological period as significant as the industrial revolution **Religion and Educational Research** David Kabisch, 2019 Religious education is always a local or regional practice This is evident in the studies in the present volume on religion and education The production and the transfer of knowledge in this field are

particular and take place in certain historical contexts so that both can be understood as historical processes With regard to these theoretical assumptions the authors of the present volume deliver case studies concerning religious education research in Germany Ireland Sweden Argentina as well as other countries Several questions from these contributions might be relevant for further studies Is religion being underrated in educational research Is education on the other hand being underrated in religious studies Do these questions depend on national traditions in educational as well as religious research Are there transnational exchanges between countries through networks guilds and media And finally what might be the additional benefits of such research compared to international comparative studies
