Information Systems for Emergency Management Bartel Van De Walle, Murray Turoff, Starr Roxanne Hiltz, 2014-12-18 This book provides the most current and comprehensive overview available today of the critical role of information systems in emergency response and preparedness It includes contributions

from leading scholars practitioners and industry researchers and covers all phases of disaster management mitigation preparedness response and recovery Foundational chapters provide a design framework and review ethical issues Context chapters describe the characteristics of individuals and organizations in which EMIS are designed and studied Case Study chapters include systems for distributed microbiology laboratory diagnostics to detect possible epidemics or bioterrorism humanitarian MIS and response coordination systems Systems Design and Technology chapters cover simulation geocollaborative systems global disaster impact analysis and environmental risk analysis Throughout the book the editors and contributors give special emphasis to the importance of assessing the practical usefulness of new information systems for supporting emergency preparedness and response rather than drawing conclusions from a theoretical understanding of the potential benefits of new technologies The Politics of Weapons Inspections Nathan E. Busch, Joseph F. Pilat, 2017-03-21

Given recent controversies over suspected WMD programs in proliferating countries there is an increasingly urgent need for effective monitoring and verification regimes the international mechanisms including on site inspections intended in part to clarify the status of WMD programs in suspected proliferators Yet the strengths and limitations of these nonproliferation and arms control mechanisms remain unclear How should these regimes best be implemented What are the technological political and other limitations to these tools What technologies and other innovations should be utilized to make these regimes most effective How should recent developments such as the 2015 Iran nuclear deal or Syria's declared renunciation and actual use of its chemical weapons influence their architecture The Politics of Weapons Inspections examines the successes failures and lessons that can be learned from WMD monitoring and verification regimes in order to help determine how best to maintain and strengthen these regimes in the future In addition to examining these regimes technological political and legal contexts Nathan E Busch and Joseph F Pilat reevaluate the track record of monitoring and verification in the historical cases of South Africa Libya and Iraq assess the prospects of using these mechanisms in verifying arms control and disarmament and apply the lessons learned from these cases to contemporary controversies over suspected or confirmed programs in North Korea Iran and Syria Finally they provide a forward looking set of policy recommendations for the future Forensic Rhetorics and Satellite Surveillance Marouf Hasian Jr., 2016-07-25

Forensic Rhetorics and Satellite Surveillance The Visualization of War Crimes and Human Rights Violations uses cases studies of satellite surveillance over the skies of Darfur Gaza Bosnia Pakistan and the Mediterranean to provide readers with an overview of some of the technological analytic and political complexities of satellite surveillance imagery usage Marouf Hasian Jr illustrates how our earlier reliance on witness testimony or signal communications in human rights contexts is now being supplemented with forensic evidence from satellites that can be used to document monitor and perhaps even deter human rights violations on the ground **Space Security and Global Cooperation** Ajey Lele, Gunjan Singh, 2009
