*It Security Products for Corporate Users* Peter Stelzhammer, Andreas Clementi, Thomas Arlt, Philippe Rödlach, 2010 Most organizations are aware of the risks threatening their IT environment Viruses trojans worms exploits and many other threats represent a serious danger for the IT department A collapse of the IT system could mean grave financial losses right up to insolvency for a company The IT departments of companies are conscious of this problem Getting the best protection against these threats is the only issue A simple file antivirus solution alone is totally inadequate as there are too many threats from contaminated e mails exploits etc What is required is a comprehensive suite that provides protection against all of these Functional Diversity Because of the immense functional diversity of various antivirus suites and corporate products it is becoming increasingly difficult for decision makers in the IT sector to get a proper overview Which product should one opt for and for which areas of protection During these tests our main focus has not been on malware detection rates but on the products handling and user friendliness and the scope of functionality We have compiled the functional scope of various products in a detailed table For malware detection rates of individual products please refer to the tests of our website <http://www.av-comparatives.org> **Government Reports Announcements & Index** ,1981-07
