

## ENGINE IMMOBILISER

Immobiliser warning light 

This prevents the vehicle being driven by anyone not in possession of the vehicle's coded ignition key.

Any work on or modification to the engine immobiliser system (computers, wiring, etc.) may be dangerous. Work must be carried out by qualified RENAULT network personnel.

### Operating principle

The vehicle is automatically protected for a few seconds after the key is removed from the ignition.

If the vehicle does not recognise the ignition key code, warning light **I** will flash continuously and the engine cannot be started.

- **System operation indicator light**

When the ignition is switched on, warning light **I** comes on for approximately three seconds and then goes out. The vehicle has recognised the code. You can then start the engine.

- **Vehicle protection indicator light**

A few seconds after the ignition has been switched off, indicator light **I** will flash continuously.

The vehicle will not be protected until the key has been taken out of the ignition.

- **Operating fault warning light**

After the ignition has been switched on, if warning light **I** remains continuously lit or continues to flash, this indicates an operating fault in the system.

In all cases, it is essential to contact a RENAULT Dealer. Only RENAULT Dealers are qualified to repair the engine immobiliser.

If the coded ignition key is faulty, use the second key (supplied with the vehicle). If you do not have access to this, it is essential to contact a RENAULT Dealer. Only RENAULT Dealers are authorised to repair the engine immobiliser system.
