Planning and Reporting in BI-supported Controlling Dietmar Schön, 2023-07-24. Planning and reporting solutions in many companies still suffer from poor data quality; are insufficiently integrated and are often time- and cost-intensive. This practice-oriented book shows step by step how things can be done differently. It systematically shows how modern planning and reporting systems in BI-supported controlling can be set up with the use of data warehouse and big data technology and usefully supplemented with AI-supported features. For the 4th edition, the book has been comprehensively updated. The extensive controlling cockpit example has been expanded. It now contains suggestions for the areas of corporate management, operational and strategic controlling, sales, production, purchasing, and project management. In addition, the latest developments in BI-supported controlling with the support of traditional and explorative BI are highlighted, including data mining, predictive analytics, artificial intelligence, RPA, chatbots, data discovery, data visualization, app technology, self-service BI, and cloud computing. Further innovations concern the topics of data quality and data modeling. The final chapter is Mobile BI, which deals with the expansion of powerful mobile analysis and planning solutions with the help of tablets, mobile phones, and other mobile devices. **Morbidity and Mortality Weekly Report**, 1981 **Urban Transportation Abstracts**, 1986
