**Beyond the Ultimate Question** Bob E. Hayes, 2009-05-04 Business growth depends on more than asking a single question Challenging the widely touted Net Promoter Score NPS claims author Bob E Hayes provides compelling evidence that to grow their business companies need to look beyond this simple question to efforts on improving the entire customer feedback program CFP First customer loyalty consists of three components advocacy purchasing and retention each providing unique and useful information regarding future business growth By measuring these three components of customer loyalty companies will be better able to manage their customer relationships to maximize growth through new and existing customers Second because of the diverse business practices companies can employ with respect to their CFPs there are hundreds of different ways a company can structure its particular program Some companies have top executive support for their programs while others do not Some companies integrate their customer feedback data into their daily business processes while others keep them separate Some companies use customer feedback results as part of their employee incentive programs while other companies rely on more traditional incentive programs Still some companies conduct in depth customer research using their feedback data while others rely on basic reporting of their customer feedback data for their customer insight But are there critical elements of a customer feedback program that are absolutely necessary for its success Can a company exclude some elements from its program without adversely impacting its effectiveness How important are certain components in increasing customer loyalty This book answers these questions It is a direct result of the author s scientific research and professional experience in the field of customer satisfaction and loyalty This book represents the first scientific study that has tried to identify the best practices of customer feedback programs Hayes formally collected
