Education Reform and the Limits of Policy Michael Addonizio,C. Philip Kearney,2012 While there is no doubt that an abundance of newly enacted education policies abounds across the state and across the nation more fundamental questions remain What is the nature of these reforms What do they hope to accomplish How successful have they been In this book we attempt to provide some answers to these questions by examining a major set of education policy reforms undertaken in Michigan and across the country over the past 20 or more years These innovations include finance reform state assessment of student performance a series of school accountability measures charter schools schools of choice and for Detroit a bevy of oft conflicting policies and reform efforts that have belabored but seldom helped its public schools In the pages that follow we examine the decidedly mixed outcomes and effects of this large array of reform policies and programs Each chapter addresses a specific policy area outlining reform activity across the nation with an emphasis on Michigan s efforts as well as on one or two states that led these changes *Resources in Education* ,2000-04

Learning from the Federal Market-Based Reforms William J. Mathis,Tina M. Trujillo,2016-06-01 Over the past twenty years educational policy has been characterized by top down market focused policies combined with a push toward privatization and school choice The new Every Student Succeeds Act continues along this path though with decision making authority now shifted toward the states These market based reforms have often been touted as the most promising response to the challenges of poverty and educational disenfranchisement But has this approach been successful Has learning improved Have historically low scoring schools turned around or have the reforms had little effect Have these narrow conceptions of schooling harmed the civic and social purposes of education in a democracy This book presents the evidence Drawing on the work of the nation s most prominent researchers the book explores the major elements of these reforms as well as the social political and educational contexts in which they take place It examines the evidence supporting the most common school improvement strategies school choice reconstitutions or massive personnel changes and school closures

From there it presents the research findings cutting across these strategies by addressing the evidence on test score trends teacher evaluation miracle schools the Common Core State Standards school choice the newly emerging school improvement industry and re segregation among others The weight of the evidence indisputably shows little success and no promise for these reforms Thus the authors counsel strongly against continuing these failed policies The book concludes with a review of more promising avenues for educational reform including the necessity of broader societal investments for combatting poverty and adverse social conditions While schools cannot single handedly overcome societal inequalities important work can take place within the public school system with evidence based interventions such as early childhood education detracking adequate funding and full service community schools all intended to renew our nation s commitment to democracy and equal educational opportunity **The Young Adolescent and the Middle School** Steven B.

Mertens,Vincent A. Anfara,Micki M. Caskey,2007-04-01 Sponsored by the Middle Level Education Research SIG and the National Middle School Association The Young Adolescent and the Middle School focuses on issues related to the nature of young adolescence and the intersection of young adolescence with middle level schooling This volume of the Handbook of Research in Middle Level Education marks the sixth installment in the series The Handbook series begun in 2001 by Vince Anfara the series editor has addressed varying thematic issues important to middle level education research This volume The Young Adolescent and the Middle School focuses on the unique developmental needs of young adolescents and the role of the middle school in attending to these needs The contributing authors in this volume address one of three developmental areas critical to young adolescents physical development intellectual cognitive development or social and personal development and how these developmental characteristics affect the educational environment and the organization of middle schools

Making the Unequal Metropolis Ansley T. Erickson,2016-04-01 In a radically unequal United States schools are often key sites in which injustice grows Ansley T Erickson s Making the Unequal Metropolis presents a broad detailed and damning argument about the inextricable interrelatedness of school policies and the persistence of metropolitan scale inequality While many accounts of education in urban and metropolitan contexts describe schools as the victims of forces beyond their control Erickson shows the many ways that schools have been intertwined with these forces and have in fact via land use decisions curricula and other tools helped sustain inequality Taking Nashville as her focus Erickson uncovers the hidden policy choices that have until now been missing from popular and legal narratives of inequality In her account inequality emerges not only from individual racism and white communities resistance to desegregation but as the result of long standing linkages between schooling property markets labor markets and the pursuit of economic growth By making visible the full scope of the forces invested in and reinforcing inequality Erickson reveals the complex history of and broad culpability for ongoing struggles in our schools **NAEP ...
