

## 3.2 Application (example)

Our example shows a typical X V-AMP application: Connection to a guitar amp (BEHRINGER V-TONE GMX212) using operating mode A1-F3 (without speaker simulation). The V-TONE GMX212 features a stereo aux input, while many other amps have only a mono instrument input. For jam sessions at your own pad, connect a set of high-quality headphones (e.g. our BEHRINGER HPS3000) to the LINE OUT/PHONES connector.

Fig. 3.1: Standard application (example)

## 4. PRESETS

Your X V-AMP features 100 user-reversible presets (00-99). Each preset consists out of a maximum of 7 "ingredients":

- ▲ amp simulation,
- ▲ speaker simulation,
- ▲ pre-amp effects (noise gate, compressor, Wah Wah),
- ▲ adjustable presence and bass EQs,
- ▲ modulation effect (e.g. phaser, chorus etc.),
- ▲ delay effect and
- ▲ reverb.

When the STORE key lights up, it means that a preset was modified but hasn't been stored yet. When the STORE LED is no longer on, the stored preset shown in the display is active. When the STORE key blinks (briefly press STORE), you can use the UP/DOWN footswitches ([08] & [09]) to dial up another storage space, where you can then store the current settings. Storing is done by keeping the STORE key pressed for longer than 2 seconds.

A single factory preset can be restored by keeping TAP + STORE pressed for longer than 2 seconds. You can also restore all factory presets by keeping TAP + STORE pressed for longer than 2 seconds while you are powering up your X V-AMP.

When you dial up a preset or when editing a preset is complete, the key LEDs indicate the active blocks.

### 4.1 Calling up presets

The preset you used last is always automatically recalled when you turn your X V-AMP on.

### 4.2 Editing presets

Editing presets on your X V-AMP is quick and easy to do. One way to do this is to call up a preset of your choice and then modify it according to your own taste. Select an amp model of your choice by turning the FX/AMPS control.

The STORE LED is lit up, signaling that you have modified a preset. If you now wish to add a modulation effect to this preset, simply press the MODUL key [7]. Now you can use the FX/AMPS control to make a selection among the effects. To store your settings, keep the STORE key pressed for about 2 seconds.

**ESP** Almost all delay and modulation effects feature a tempo or time parameter. Say, you want to adjust an effect to the tempo of your playback material: To do this, tap the TAP key at least twice in the beat of your music. The effect tempo adjusts itself automatically to the tempo of your music.

### 4.3 Storing presets

When the STORE key is blinking (briefly pressing STORE) you can use the UP/DOWN footswitches ([08] & [09]) to dial up another storage slot so you can store your current settings at this location. You store your settings by keeping the STORE key pressed for longer than 2 seconds.
