Vivero-Pol,Tomaso Ferrando,Olivier De Schutter,Ugo Mattei,2018-12-17 From the scientific and industrial revolution to the present day food an essential element of life has been progressively transformed into a private transnational mono dimensional commodity of mass consumption for a global market But over the last decade there has been an increased recognition that this can be challenged and reconceptualized if food is regarded and enacted as a commons This Handbook provides the first comprehensive review and synthesis of knowledge and new thinking on how food and food systems can be thought interpreted and practiced around the old new paradigms of commons and commoning The overall aim is to investigate the multiple constraints that occur within and sustain the dominant food and nutrition regime and to explore how it can change when different elements of the current food systems are explored and re imagined from a commons perspective Chapters do not define the notion of commons but engage with different schools of thought the economic approach based on rivalry and excludability the political approach recognizing the plurality of social constructions and incorporating epistemologies from the South the legal approach that describes three types of proprietary regimes private public and collective and different layers of entitlement bundles of rights and the radical activist approach that considers the commons as the most subversive coherent and history rooted alternative to the dominant neoliberal narrative These schools have different and rather diverging epistemologies vocabularies ideological stances and policy proposals to deal with the construction of food systems their governance the distributive implications and the socio ecological impact on Nature and Society The book sparks the debate on food as a commons between and within disciplines with particular attention to spaces of resistance food sovereignty de growth open knowledge transition town occupations bottom up social innovations and organizational scales local food national policies South South collaborations international governance and multi national agreements Overall it shows the consequences of a shift to the alternative paradigm of food as a commons in terms of food the planet and living beings Modern Trends in Diatom Identification Gabriel Cristóbal,Saúl Blanco,Gloria

Bueno,2020-05-28 High resolution images of phytoplankton cells such as diatoms or desmids which are useful for monitoring

water quality can now be provided by digital microscopes facilitating the automated analysis and identification of specimens. Conventional approaches are based on optical microscopy; however, manual image analysis is impractical due to the huge diversity of this group of microalgae and its great morphological plasticity. As such, there is a need for automated recognition techniques for diagnostic tools, e.g. environmental monitoring networks, early warning systems to improve the management of water resources and decision making processes. Describing the entire workflow of a bioindicator system from capture, analysis and identification to the determination of quality indices, this book provides insights into the current state of the art in automatic identification systems in microscopy.

**Sociology in South Africa** R. Sooryamoorthy, 2016-08-13 This book is the first comprehensive account of the history and current state of South African sociology. Providing a holistic picture of the subject both as it is taught in universities and as a field of research, it reveals the trajectories of a discipline in a challenging socio-political context. With the support of historical and scientometric data, it demonstrates how the changing political situation from colonialism to apartheid to democracy has influenced the nature, direction and foci of sociological research in the country. The author shows how during the apartheid era sociology was professionally fragmented and divided along language and race lines. It was, however, able to flourish with the advent of democracy in 1994 and has become a unique academic movement. This insightful work will appeal to students and scholars of the social sciences and all those interested in the history and society of South Africa.

**Digital Technologies and the Evolving African Newsroom** Hayes Mabweazara, 2016-04-14 African newsrooms are experiencing the disruptive impact of new digital technologies on the way they generate and disseminate news. Indeed, newsrooms are being forced to adapt in various ways and there are clear dimensions of localized creativity and adaptations by journalists to the digital revolution. In the same way, the influences of digitization, Internet and social media are changing the informational needs of readers, including how they engage with news. These developments nonetheless remain on the margins of mainstream journalism research; very few researchers have sought to qualitatively capture the implications of developments in digital technologies on the routine practices of African journalists, especially in their natural habitat, the newsroom. In this light, this edited volume interrogates the changing ecology of newsmaking in Africa in the context of rapid technological changes in newsrooms as well as in the wider social context of news production. It brings together six contributions drawn from five countries: Egypt, Mozambique, South Africa, Nigeria and Zimbabwe, to explore practices, challenges and professional normative dilemmas emerging with the adoption and appropriation of new technologies. While the studies point to dimensions of localised new technology appropriations as defined by the complex socio-political structures in which African journalists operate, they are not rigidly confined to Africa. They are expressly in dialogue with theoretical observations largely emerging from Western scholarship. In this sense, the book goes beyond simply mainstreaming African perspectives; it engages directly with dominant theoretical observations and offers a point of departure for developing what could loosely be branded as an African digital journalism epistemology. This

book was originally published as a special issue of Digital Journalism      **Storm over South Africa** Michael G. Urban Mobility in a Global Perspective Oliver Schwedes, 2017 For the first time in human history the majority of the world's population is now no longer living in rural areas but in cities Whereas in the industrialised countries urban and
