Jessie Bustillos Morales, Sandra Abegglen, 2020-03-04 Understanding Education and Economics explores the multiple ways in which the field of education and schooling has become closely aligned with economic imperatives and interests and the impact of this on learning and teaching. In particular, the increasing influence of economic arguments, economic ideologies, and government involvement in education have made apparent that there is a need to reflect and talk about economic influences and trends in education. Drawing on the expertise of educationalists around the world, the book articulates key debates and theoretical perspectives which can give both students and staff across several courses within the study of education a framework for discussing and analysing how economics defines and shapes the nature and purposes of education. The chapters offer discussions and reflections on key issues including the historical developments that led to the creation of a formal education system in England and Wales, the ways in which neoliberalism underpins education, including the coercion of education to serve economic needs, the economics of the university as an institution. Addressing philosophical, sociological, historical, psychological, and social issues in education and encouraging readers to pose questions about the nature of education, this book is a valuable resource for students and staff alike and will allow them to broaden perspectives on what education could be for and what it should be for.
