Commercial Law Reports 2016, 2016-12-31 Commercial law judgments South Africa **The Vaal Uprising of 1984 & the Struggle for Freedom in South Africa** Franziska Rueedi, 2021 Offers new insights into the struggle against Apartheid and the poverty and inequality that instigated political resistance *Farmer's Weekly*, 1928 Microstructural Geochronology Desmond E. Moser, Fernando Corfu, James R. Darling, Steven M. Reddy, Kimberly Tait, 2017-12-26

Microstructural Geochronology Geochronology techniques enable the study of geological evolution and environmental change over time This volume integrates two aspects of geochronology one based on classical methods of orientation and spatial patterns and the other on ratios of radioactive isotopes and their decay products The chapters illustrate how material science techniques are taking this field to the atomic scale enabling us to image the chemical and structural record of mineral lattice growth and deformation and sometimes the patterns of radioactive parent and daughter atoms themselves to generate a microstructural geochronology from some of the most resilient materials in the solar system First compilation of research focusing on the crystal structure material properties and chemical zoning of the geochronology mineral archive down to nanoscale Novel comparisons of mineral time archives from different rocky planets and asteroids and their shock metamorphic histories Fundamentals on how to reconstruct and date radiogenic isotope distributions using atom probe tomography Microstructural Geochronology will be a valuable resource for graduate students academics and researchers in the fields of petrology geochronology mineralogy geochemistry planetary geology astrobiology chemistry and material science It will also appeal to philosophers and historians of science from other disciplines *Afrotropical Streams and Rivers* Tatenda Dalu, Frank Masese, 2024-11-09 The Afrotropical Streams and Rivers Structure Ecological Processes and Management is a comprehensive guide that provides assessment of major rivers and tributaries in Africa Unlike other books available the editors present a thorough study of geomorphological hydrological biological and ecological processes incorporating a range of plant and animal communities while considering implications of human communities that depend upon them This book edited by a diverse cohort of researchers and or scholars is intended as an educational and practical guide for graduate students researchers and scientists who focus on the biodiversity conservation and management policy issues of the African river systems Provides a comprehensive introduction to African freshwater rivers their biota and abiotic processes Contains unique case studies on African streams and rivers Organised around an interdisciplinary approach that covers the complex aspects of conservation and management of African river systems on the continent *Social Constructions of Water Quality in South Africa* Suvania Naidoo, 2022-05-04 This book details how the water quality of the Blesbokspruit River in Gauteng South Africa was socially constructed by stakeholders and key individuals in the context of acid mine drainage AMD and its treatment Social constructionism is used as the framing for this research to explain how water is intrinsically social Findings presented here show that stakeholders are aware that the changes in the physicality of

the Blesbokspruit resulted from human interventions and varied uses of the water over the years. Such knowledge among factors such as the historical context of mining, current coal mining flows and volumes of water technology used and processes followed, information and communication and vested interests influence social constructions of the water quality. What counts as the truth about water varies depending on the individual's perspective, their purpose and their individual interests. Further, how one defines water quality influences what treatment processes are preferred in order to improve water quality. The book explains why, for example, a treatment process meant to improve water quality gained a bad reputation by the public because of the South African government's silo approach. The book explains how these social constructions are entrenched in power relations between stakeholders regarding AMD treatment and illustrates how power was used to influence decisions to improve the water quality of the Blesbokspruit. The case presented in this book offers insights and recommendations for policymakers working in water governance, including means to influence social constructions of water quality and ways to clarify roles and responsibilities in pursuit of improved cooperative government.

Novel Materials for Environmental Remediation Applications Dimitrios A. Giannakoudakis, Lucas Meili, Ioannis Anastopoulos, 2022-10-01. *Novel Materials for Environmental Remediation Applications: Adsorption and Beyond* presents detailed comprehensive coverage of novel and advanced materials that can be applied to address the growing global concern of the pollution of natural resources in water, the air, and in soil. The book provides up-to-date knowledge of state-of-the-art materials and treatment processes as well as details of applications, including adsorptive remediation and catalytic remediation. Chapters include the characteristics of materials, basic and important physicochemical features for environmental remediation applications, routes of synthesis, recent advances as remediation media, and future perspectives. This book offers an interdisciplinary and practical examination of novel materials and processes for environmental remediation that will be valuable to environmental scientists, materials scientists, environmental chemists, and environmental engineers alike. Highlights a wide range of synthetic methodologies, physicochemical and engineered features of novel materials and composites/hybrids for environmental purposes. Presents applications of adsorbents or catalysts for water/wastewater treatment and air purification technologies such as advanced oxidation processes, adsorption, photocatalysis, coagulation, flotation, membrane separation, filtration, and others. Provides comprehensive consolidated coverage of novel materials for environmental remediation applications for researchers in environmental science, materials science, and industry to identify in-depth solutions to pollution.

Self-Directed Learning in the era of the COVID-19 pandemic Josef de Beer, Neal Petersen, Elsa Mentz, Robert J. Balfour, 2023-03-01. The book is devoted to scholarship in the field of pre-service teacher education with a specific focus on research into the enhancement of self-directed learning and contributes to the discourse on creating a disposition towards self-directed learning during the social and academic integration of first-year students within higher education institutions. Two chapters also deal with research on the development of self-directed learning and nuanced

understandings of the chosen professions of Law and Health Sciences students The target audience is scholars working in the fields of teacher education self directed learning engaging pedagogies problem based learning cooperative learning and gamification Whereas social constructivist learning theory served as an overarching theoretical framework for the virtual excursions the various chapters in the book also draw on other secondary theories such as self determination theory social interdependence theory gender theory and the with fitness model of Kounin 1970 Proceedings of 9th Edition of International Conference on BIOFUELS AND BIOENERGY 2018 EuroScicon,2018-03-23 March 29 30 2018 Edinburgh Scotland Key Topics Biomass Biogas Bioenergy Renewable Energy Biorefineries Bioethanol Biodiesel Aviation Biofuels Advanced Biofuels Algal Biofuels Nanotechnology In Biofuels Food V S Fuel Debate Bioeconomy Energy And Environment Green Energy And Economy Advances In Renewable Chemicals Entrepreneurs Investment Meet **Routledge Handbook of Food as a Commons** Jose Luis Vivero-Pol,Tomaso Ferrando,Olivier De Schutter,Ugo Mattei,2018-12-17 From the scientific and industrial revolution to the present day food an essential element of life has been progressively transformed into a private transnational mono dimensional commodity of mass consumption for a global market But over the last decade there has been an increased recognition that this can be challenged and reconceptualized if food is regarded and enacted as a commons This Handbook provides the first comprehensive review and synthesis of knowledge and new thinking on how food and food systems can be thought interpreted and practiced around the old new paradigms of commons and commoning The overall aim is to investigate the multiple constraints that occur within and sustain the dominant food and nutrition regime and to explore how it can change when different elements of the current food systems are explored and re imagined from a commons perspective Chapters do not define the notion of commons but engage with different schools of thought the economic approach based on rivalry and excludability the political approach recognizing the plurality of social constructions and incorporating epistemologies from the South the legal approach that describes three types of proprietary regimes private public and collective and different layers of entitlement bundles of rights and the radical activist approach that considers the commons as the most subversive coherent and history rooted alternative to the dominant neoliberal narrative These schools have different and rather diverging epistemologies vocabularies ideological stances and policy proposals to deal with the construction of food systems their governance the distributive implications and the socio ecological impact on Nature and Society The book sparks the debate on food as a commons between and within disciplines with particular attention to spaces of resistance food sovereignty de growth open knowledge transition town occupations bottom up social innovations and organizational scales local food national policies South South collaborations international governance and multi national agreements Overall it shows the consequences of a shift to the alternative paradigm of food as a commons in terms of food the planet and living beings *Non-Western Identity* Byron G. Adams,Fons J. R. van de Vijver,2022-02-02 Identity is a construct strongly rooted and still predominantly studied in Western or WEIRD Western educated industrialized rich and

democratic contexts e.g. North American and Western European. Only recently has there been more of a conscious effort to study identity in non-Western or non-WEIRD contexts. This edited volume investigates identity from primarily a non-Western perspective by studying non-Western contexts and non-Western minority or immigrant groups living in Western contexts. The contributions examine different aspects of identity e.g. personal identity, social identity, online identity as either independent or interrelated constructs; b) consider the associations of these constructs with aspects of intergroup relations, acculturative processes and/or psychological well-being; c) document the advancement in research on identity in underrepresented groups, contexts and regions such as Africa, Asia, Eastern Europe, the Middle East and South America; and d) evaluate different approaches to the study of identity and the implications thereof. This book is intended for cultural or cross-cultural academics, practitioners, educators, social workers, postgraduate students, undergraduate students and scholars interested in studying identity. It provides insight into how identity in non-Western groups and contexts may both be informed by and may inform Western theoretical perspectives.

Landscapes of Human Evolution James Cole, John McNabb, Matt Grove, Rob Hosfield, 2020-02-13. Fourteen papers are presented here in honour of John Gowlett. John has a wide range of research interests primarily focused on the human genus *Homo* and is a world leader in understanding the cognitive and behavioural preconditions necessary for the emergence of complex behaviours such as language and art.

Trade Unions and the Age of Information and Communication Technologies in Kenya Eric E. Otenyo, 2017-03-01. *Trade Unions and the Age of Information and Communication Technologies in Kenya* provides a comprehensive description of the use of ICTs within the trade union movement in Kenya. In this book Professor Eric Otenyo explores the intersection between new technologies and union as key stakeholders in national governance and development. The dearth of research on how trade unions can play a part in the new economy continues to undermine the effective use of ICTs in development. This book brings to light the challenges that unions face while navigating the new economy and netstate characterized by a proliferation of ICTs and globalization.

Implementing Environmental Constitutionalism Erin Daly, James R. May, 2018-11-08. Constitutions can play a central role in responding to environmental challenges such as pollution, biodiversity loss, lack of drinking water and climate change. The vast majority of people on earth live under constitutional systems that protect the environment or recognize environmental rights. Such environmental constitutionalism however falls short without effective implementation by policymakers, advocates and jurists. *Implementing Environmental Constitutionalism: Current Global Challenges* explains and

explores this implementation gap This collection is both broad and deep While some of the essays analyze crosscutting themes such as climate change and the need for rule of law that affect the implementation of environmental constitutionalism throughout the world others delve deeply into geographically contextual experiences for lessons about how constitutional environmental law might be more effectively implemented This volume informs global conversations about whether and how environmental constitutionalism can be made more effective to protect the natural environment **Parasite and Disease**

Africa R. Sooryamoorthy, 2016-08-13 This book is the first comprehensive account of the history and current state of South African sociology Providing a holistic picture of the subject both as it is taught in universities and as a field of research it reveals the trajectories of a discipline in a challenging socio political context With the support of historical and scientometric data it demonstrates how the changing political situation from colonialism to apartheid to democracy has influenced the nature direction and foci of sociological research in the country The author shows how during the apartheid era sociology was professionally fragmented and divided along language and race lines It was however able to flourish with the advent of democracy in 1994 and has become a unique academic movement This insightful work will appeal to students and scholars of the social sciences and all those interested in the history and society of South Africa Annual Report of the Commission on

Gender Equality South Africa. Commission on Gender Equality, 2016 Democracy's Infrastructure Antina von Schnitzler, 2016-10-25 In the past decade South Africa's miracle transition has been interrupted by waves of protests in relation to basic services such as water and electricity Less visibly the post apartheid period has witnessed widespread illicit acts involving infrastructure including the nonpayment of service charges the bypassing of metering devices and illegal connections to services Democracy's Infrastructure shows how such administrative links to the state became a central political terrain during the antiapartheid struggle and how this terrain persists in the post apartheid present Focusing on conflicts surrounding prepaid water meters Antina von Schnitzler examines the techno political forms through which democracy takes shape Von Schnitzler explores a controversial project to install prepaid water meters in Soweto one of many

efforts to curb the nonpayment of service charges that began during the antiapartheid struggle and she traces how infrastructure payment and technical procedures become sites where citizenship is mediated and contested She follows engineers utility officials and local bureaucrats as they consider ways to prompt Sowetans to pay for water and she shows how local residents and activists wrestle with the constraints imposed by meters This investigation of democracy from the perspective of infrastructure reframes the conventional story of South Africa s transition foregrounding the less visible remainders of apartheid and challenging readers to think in more material terms about citizenship and activism in the postcolonial world Democracy s Infrastructure examines how seemingly mundane technological domains become charged territory for struggles over South Africa s political transformation
