✓ Exclusively available on IvyPanda

In order to offer medical care that is safe, successful, patient-centered, prompt, practical, and fair, professionalism is essential. Through oaths and standards, the fundamental principles of medical professionalism are profoundly ingrained in the historical setting. Numerous studies, such as the one by Bhardwaj (2022), have shown that unprofessional actions by healthcare professionals have a negative effect on health outcomes. These include an increase in infections, readmission rates, health complications, client financial and mental damage, exposure to medical malpractice, reduced job satisfaction, and higher staff turnover among team members (Bhardwaj, 2022). As a result, professionalism in healthcare is an integral element that focuses on the creation of safe conditions and the provision of quality care.

Professionalism has been a cornerstone of clinical practice since the days of Hippocrates, acting as the foundation of medicine's connection to society. This unofficial understanding was revived in the 1990s when experts in the medical establishment outlined a more sophisticated set of ethical principles and performance expectations that have to be met in the provision of clinical therapy (Bhardwaj, 2022). These critical components have gradually been integrated into undergraduate and graduate education and training. This took place along with a focus on appropriate professional behavior and the advancement of moral guidelines for the efficient and safe provision of clinical treatment in addition to actions in the public sphere (Poorchangizi et al., 2019). Benevolence, reliability, accountability, the pursuit of excellence, understanding of responsibility, autonomy, truthfulness, righteousness and honesty, cooperation, compassion for others, ongoing learning and progress, and humility make up the essential elements of this paradigm for professionalism (Bhardwaj, 2022). As a result, when looking at professionalism, it is first necessary to consider the main aspects maintained since antiquity.

However, professionalism must be reviewed in terms of the association's guidelines. For example, according to the Association of American Medical Colleges, professionalism is essential for becoming a qualified doctor (Forouzadeh et al., 2018). Professionalism is built on three pillars: medical competence, communication abilities,

Dzur,2015-10-20 Bringing expert knowledge to bear in an open and deliberative way to help solve pressing social problems is a major concern today when technocratic and bureaucratic decision making often occurs with little or no input from the general public Albert Dzur proposes an approach he calls democratic professionalism to build bridges between specialists in domains like law medicine and journalism and the lay public in such a way as to enable and enhance broader public engagement with and deliberation about major social issues Sparking a critical and constructive dialogue among social theories of the professions professional ethics and political theories of deliberative democracy Dzur reveals interests motivations strengths and vulnerabilities in conventional professional roles that provide guideposts for this new approach He then applies it in examining three practical arenas in which experiments in collaboration and power sharing between professionals and citizens have been undertaken public journalism restorative justice and the bioethics movement Finally he draws lessons from these cases to refine this innovative theory and identify the kinds of challenges practitioners face in being both democratic and professional **Edinburgh History of the Book in Scotland, Volume 4: Professionalism and Diversity 1880-2000** David Finkelstein,2007-11-23 In this volume a range of
