**PALEOLITHIC ERA**

**The Unique Characteristics of the Paleolithic Era**

The Paleolithic Era, also known as the Old Stone Age, was a time when early humans lived in small, nomadic groups. This period, lasting from about 2.5 million years ago to roughly 10,000 BCE, is considered some of the most important developments in human history.

One of the defining characteristics of the Paleolithic Era was the nomadic lifestyle. Early humans moved from place to place, following herds of animals and searching for plants to eat. They did not settle in one location but instead lived in temporary shelters like caves or simple huts made from branches and animal skins.

Another key feature was hunting and gathering, meaning they obtained food by hunting wild animals and gathering wild plants, fruits, and nuts. These activities were essential for the survival of Paleolithic humans.

**The Great Paleolithic War** David J. Meltzer, 2015-11-03 Following the discovery in Europe in the late 1850s that humanity had roots predating known history and reaching deep into the Pleistocene era scientists wondered whether North American prehistory might be just as ancient And why not The geological strata seemed exactly analogous between America and Europe which would lead one to believe that North American humanity ought to be as old as the European variety This idea set off an eager race for evidence of the people who might have occupied North America during the Ice Age a long and as it turned out bitter and controversial search In The Great Paleolithic War David J Meltzer tells the story of a scientific quest that set off one of
