**3 Tom Swift and the Transcontinental BulleTrain (HB)** Victor Appleton II, 2013-10-13 In this hardbound edition of the third book in the series the President desperate to leave some sort of legacy has promised the nation that a great freight hauling bullet train system will cross the country starting in just one year The biggest problem Nobody has started to design or build anything on a project that should take 10 years When his advisors hatch a plan to split the work into dozens of manageable pieces only a small handful of companies sign on Tom Swift believes that he can figure a way to dig the massive tunnels under the various mountain ranges on the western half of the country and may even be able to build the locomotive engines but the other companies begin to abandon their work making it necessary for Enterprises to take on more and more A rival company owner has it in for Tom and a mysterious source of governmental sabotage is somewhere in Washington DC With time and so many other things against him is it going to be a mission impossible for the young inventor **Federal Register**, 2014

**Artificial Intelligence in Education** Cristina Conati, Neil Heffernan, Antonija Mitrovic, M. Felisa Verdejo, 2015-06-16 This book constitutes the refereed proceedings of the 17th International Conference on Artificial Intelligence in Education AIED 2015 held in Madrid Spain in June 2015 The 50 revised full papers presented together with 3 keynotes 79 poster presentations 13 doctoral consortium papers 16 workshop abstracts and 8 interactive event papers were carefully reviewed and selected from numerous submissions The conference provides opportunities for the cross fertilization of approaches techniques and ideas from the many fields that comprise AIED including computer science cognitive and learning sciences education game design psychology sociology linguistics as well as many domain specific areas The Structural Basis of Arrestin Functions Vsevolod V. Gurevich, 2017-05-24 This volume summarizes our current understanding of the structural basis of the functions of arrestin family of proteins Arrestins were first discovered as key players in the desensitization of G protein coupled receptors GPCRs Recent studies showed that arrestins are important signal transducers in their own right organizing multi protein complexes and scaffolding numerous signaling cascades that regulate cell

proliferation differentiation and apoptotic death Here arrestin functions are described primarily from the structural prospective The book covers basal structure of arrestin proteins receptor binding induced conformational changes in arrestins as well as the structure of pre activated mutants Particular focus is on the arrestin elements interacting with numerous binding partners GPCRs and cytoplasmic signaling proteins We expect that this information and insights will help to understand and exploit the phenomenon of signaling bias which is a new promising direction in drug discovery The chapters are written by the world class specialists in the field mostly the people who actually contributed the data discussed The book gives coherent historical prospective and describes the most recent findings The book would be particularly useful for scientists in academia and industry working in the fields of pharmacology cell biology structural biology and drug discovery We expect that the focus on the molecular basis of protein protein interactions would help to develop novel tools for engaging this important type of targets for research and therapeutic purposes
