Furstenberg, Jr., 2013-03-07 In the past decade or so scholars in the United States have identified the emergence of a new distinct stage of life as adolescence has become protracted and most young people of recent generations take longer to achieve economic and psychological autonomy than they did a half century ago This new life stage in between adolescence and adulthood when young people are in a semiautonomous state has come to be known as early adulthood Main characteristics of this new life stage include a later entry into the work force a longer period of time living in the natal home and a delayed age at marriage and childbearing These trends not only have profound implications for young adults well being and intergenerational relationships but also challenge social institutions such as family schools labor markets and many youth serving institutions      The Pacific Reporter , 1902      Sex, Love, and Friendship Adrienne Leigh McEvoy, 2011-08 The joke is that all the
