The Map in the Machine Luis F. Alvarez Leon, 2024-05-07 Digital technologies have changed how we shop work play and communicate reshaping our societies and economies To understand digital capitalism we need to grasp how advances in geospatial technologies underpin the construction operation and refinement of markets for digital goods and services In *The Map in the Machine* Luis F. Alvarez Leon examines these advances from MapQuest and Google Maps to the rise of IP geolocation ridesharing and a new Earth Observation satellite ecosystem He develops a geographical theory of digital capitalism centered on the processes of location valuation and marketization to provide a new vantage point from which to better understand and intervene in the dominant techno economic paradigm of our time By centering the spatiality of digital capitalism Alvarez Leon shows how this system is the product not of seemingly intangible information clouds but rather of a vast array of technologies practices and infrastructures deeply rooted in place mediated by geography and open to contestation and change
