Not only was he responsible for getting Raleigh's ships safely to harbor in the New World he was also the first European to acquire a working knowledge of an indigenous language from what is today the US and to record in detail the local people's way of life. In addition to his groundbreaking navigational, linguistic and ethnological work, Harriot was the first to use a telescope to map the moon's surface and independently of Galileo recorded the behavior of sunspots and discovered the law of free fall. He preceded Newton in his discovery of the properties of the prism and the nature of the rainbow to name just two more of his unsung firsts. Indeed many have argued that Harriot was the best mathematician of his age and one of the finest experimental scientists of all time. Yet he has remained an elusive figure. He had no close family to pass down records and few of his letters survive. Most importantly he never published his scientific discoveries and not long after his death in 1621 had all but been forgotten. In recent decades many scholars have been intent on restoring Harriot to his rightful place in scientific history but Arianrhod's biography is the first to pull him fully into the limelight. She has done it the only way it can be done through his science. Using Harriot's re-discovered manuscripts Arianrhod illuminates the full extent of his scientific and cultural achievements expertly guiding us through what makes them original and important and the story behind them. Harriot's papers provide unique insight into the scientific process itself. Though his thinking depended on a more natural intuitive approach than those who followed him and who achieved the lasting fame that escaped him, Harriot helped lay the foundations of what in Newton's time would become modern physics.

Thomas Harriot: A Life in Science puts a human face to scientific inquiry in the Elizabethan and Jacobean worlds and at long last gives proper due to the life and times of one of history's most remarkable minds.

Birth of a Legend Capt Arthur H. Wagner USCG (Ret), Arthur H. Wagner, LtCol Leon E. (Bill), Leon E. Braxton, 2012. Competition for Army acquisition funding in the between wars depression years was fierce. The opposing camps of Fighter Supremacy versus Strategic Bombing played out at the Air Corps Tactical School ACTS at GHQ before Congress and in the media. Military exercises pitted the Navy and the Air Corps in operations with real cloak and dagger background gambits each trying to gain the upper hand. When leaders such as Benjamin Foulois, Billy Mitchell and Frank Andrews eventually were able to foster a bomber competition to replace the Martin B-10 Boeing's four engined Model 299 was a clear winner but then it crashed at Dayton and the Army opted for the Douglas B-18. Somehow Frank Andrews had enough faith in his convictions and managed to have 13 Y1B-17s produced and sent to the 2nd Bombardment Group at Langley Field VA. There Robert Olds and his three squadrons enthralled the country with long range goodwill flights, transcontinental speed runs with an obscure 1st Lt Curtis LeMay navigating the way and a thrilling movie Test Pilot starring Clark Gable, Myrna Loy and Spencer Tracy. Fortunately for the trials of WWII these daring young men of the Army Air Corps put their careers on the line and made the B-17 one of the iconic weapons of that conflict. This is the untold story of the aircraft development and the men who made it happen.
