Safety interlocks prevent the engine from being started when it is not in neutral, and also prevent over-revving of the engine in neutral or reverse. The motor is designed for use with remote controls, and has full forward, neutral and reverse gears.

Special attention has been paid to smooth and silent running. Both induction and exhaust are effectively silenced, with cooling water being injected into the exhaust gases to shrink their volume and so reduce their velocity, and the exhaust outlet is under water. The motor is fully rubber-mounted, to reduce the transmission of noise and vibration to the boat, and the stout fibreglass power hood not only looks good, but also further silences the engine.

As with all TOMOS motors, fuel consumption has been kept to a minimum, and is approximately 1 1/2 gallons per hour at full throttle.
