programming skills alongside music theory skills Software tools form an essential part of the modern musical environment laptop musicians today can harness incredibly powerful tools to create record and manipulate sounds Yet these programs on their own don't provide musicians with an understanding of music notation and structures while traditional music theory teaching doesn't fully engage with technological capabilities With clear and practical applications this book demonstrates how to use DAWs APLs and music printing programs to create interactive resources for learning the mechanics behind how music works Offering an innovative approach to the learning and teaching of music theory in the context of diverse musical genres this volume provides game changing ideas for educators practicing musicians and students of music The author's website at <http://www.geoffreykidde.com> includes downloadable apps that support this book
