

Directions: These are the Top 10 questions that tend to appear in similar form from year to year on the Regents exams. Before trying more problems, I would recommend you understand these problems in full detail and use these problems as a basis for solving more problems online. Disclaimer: These 10 problems are a GUIDE, and should be used as a supplement rather than as a sole preparatory source.

All Questions are taken from previous Regents exams.

1. What is the value of the expression $|5x-12|$, when $x=5$?

- a. -37
- b. -13
- c. 13
- d. 37

Correct Answer: C

Explanation: Make sure you can use your calculator for this problem! Simply go to MATH to NUM, and you will see a key called "abs." This is the absolute value sign. Then simply replace the x with a five, and close parenthesis:

So it would be like this: $|5(5)-12| = |13| = 13$

Remember, a lot of problems simply require plugging in. Also, make sure you learn to use the absolute value key well. Many short answer questions have also required use of absolute value key so please be comfortable.

2. Which interval notation represents $-3 \leq x \leq 3$?

- a. $[-3, 3]$
- b. $[-3, 3)$
- c. $[-3, 3)$
- d. $[-3, 3)$

Correct Answer: A

Explanation: I would remember these two rules:

- 1. Whenever you have a equal sign, as is the case here, you use a BRACKET. So -3 and 3 have equal signs here, so both would be in bracket
- 2. Whenever you DONT have an equal sign next to a number, for example, $5 < x$ ($5 \leq x < 10$), you would use a parenthesis. So observe, the 1 has a equal sign, but 10 does NOT. So, the interval would be $[1, 10)$

Many can also be completed with the TI 83 TI 84 graphing calculator. Intended to serve as a guide for students preparing for the New York State Integrated Algebra Regents Exam, this textbook also gives alternate strategies for solving math problems that you already learned how to solve or calculate in integrated algebra class, provides extra practice on regents type questions, demonstrates how to work around quirks in the programming of the calculator, teaches developing skills needed for the Geometry and Algebra 2 Trigonometry exams, as well as college calculus and statistics courses. Some of the topics covered go beyond the scope of the Integrated Algebra exam in order to accommodate use as a text, as a mathematics elective. These can be omitted if the workbook is used as a supplement to a course leading to the Integrated Algebra regents. Prepare for the exam, learn your graphing calculator more thoroughly, and improve your knowledge of integrated algebra with Integrated Algebra on the TI 73.

Prentice Hall New York Integrated Algebra Exam A. Rose Primiani, 2008 *Problems and Questions on Algebra*, 1913 *The Brilliance of Black Children in Mathematics* Jacqueline Leonard, Danny B. Martin, 2013-03-01 This book is a critically important contribution to the work underway to transform schooling for students who have historically been denied access to a quality education, specifically African American children. The first section of the book provides some historical perspective critical to understanding the current state of education in the U.S., specifically for the education of African American children. The following sections include chapters on policy, learning, ethnomathematics, student identity, and teacher preparation as it relates to the mathematical education of Black children. Through offering counternarratives about mathematically successful Black youth, advocating for a curriculum that is grounded in African American culture and ways of thinking, providing shining examples of the brilliance of Black students, and promoting high expectations for all rather than situating students as the

problem the authors of this book provide powerful insights related to the teaching and learning of mathematics for African American students As is made evident in this book effective teaching involves much more than just engaging students in inquiry based pedagogy Kitchen 2003 The chapters offered in this book demonstrate how mathematics instruction for African American students needs to take into account historical marginalization and present day policies that do harm to Black students Kunjufu 2005 Empowering mathematics instruction for African American students needs to take into consideration and promote students cultural spiritual and historical identities Furthermore mathematics instruction for African American students should create opportunities for students to express themselves and the needs of their communities as a means to promote social justice both within their classrooms and communities
