proliferation that can be drawn from the Pakistan case It explains the changes and continuities of Pakistan's nuclear policy assessing its emerging force posture and the implications for Pakistani South Asian and global security It also considers the extent to which Pakistan can be said to have a nuclear doctrine the Pakistani nuclear command and control system and the relationship between Pakistan and the Non Proliferation regime Addressing the issue of whether Pakistan should be viewed as a proliferator and the implications of a nuclear Pakistan for global terrorism Pakistan's Nuclear Weapons is an important study of all the major issues surrounding Pakistan's emergence as a nuclear power

The Politics of Nuclear Weapons in South Asia Bhumitra Chakma, 2016-02-24 An important and critical re evaluation of South Asia's post tests nuclear politics in contrast to other books this volume emphasises the political dimension of South Asia's nuclear weapons explains how the bombs are used as politico strategic assets rather than pure battlefield weapons and how India and Pakistan utilise them for politico strategic purposes in an extremely complex and competitive South Asian strategic landscape Written by a group of perceptive observers of South Asia this volume evaluates the current state of Indo Pakistani nuclear deterrents the challenges that the two countries confront in building their nuclear forces the post test nuclear doctrines of the two strategic rivals the implications of Indo Pakistani politics for regional cooperation the role of two systemic actors USA and China in the region's nuclear politics and the critical issues of confidence building and nuclear arms control

Handbook of Nuclear Proliferation Harsh V Pant, 2012-02-27 The chapters of this proposed volume are intended to shed light on the diverse themes surrounding this very important issue area in international security Each of the six major sections addresses an aspect of nuclear proliferation that will be critical in determining the future trajectory of global politics in the years to come The first section examines the major thematic issues underlying the contemporary discourse on nuclear proliferation How do we understand this period in proliferation What accounts for a taboo on the use of nuclear weapons so far and will it survive What is the present state of nuclear deterrence models built during the Cold War What is the relationship between the pursuit of civilian nuclear energy and the risks of proliferation Why are we witnessing a move away from non proliferation to counter proliferation The second section gives an overview of the evolving nuclear policies of the five established nuclear powers the USA Russia the United Kingdom France and the People's Republic of China Section three looks at the three de facto nuclear states India Pakistan and Israel The fourth section examines the three problem areas in the proliferation matrix today Iran North Korea and the potent mix of non state actors and nuclear weapons The fifth section sheds light on an important issue often ignored during discussions of nuclear proliferation cases where states have made a deliberate policy choice of either renouncing their nuclear weapons programme or have decided to remain a threshold state The cases of South Africa Egypt and Japan will be the focus of this section The final section will examine the present state of the global nuclear non proliferation regime which most observers agree is currently facing a crisis of credibility The three pillars of this regime the Nuclear Non Proliferation Treaty NPT the Comprehensive Test Ban Treaty CTBT and the Fissile Material Cut Off

Treaty FMCT will be examined This is followed by an analysis of the present trends and prospects for US Russia nuclear arms control The impact of missile defenses and the US India civilian nuclear energy co operation pact will be examined so as to ascertain whether they have weakened or strengthened the global non proliferation regime The chapters in this volume aim to document the increasing complexity of the global nuclear proliferation dynamic and the inability of the international community to come to terms with a rapidly changing strategic milieu The future in all likelihood will be very different from the past and the chapters in this volume will try to develop a framework that may help gain a better understanding of the forces that will shape the nuclear proliferation debate in the years to come

Funding Smithsonian Scientific Research National Research Council, Division on Engineering and Physical Sciences, Board on Physics and Astronomy, Division on Earth and Life Studies, Board on Life Sciences, Committee on Smithsonian Scientific Research, 2003-02-28 This report assesses whether the Smithsonian Institution should continue to receive direct federal appropriations for its scientific research programs or if this funding should be transferred to a peer reviewed program open to all researchers in another agency The report concludes that the National Museum of Natural History the National Zoological Park and the Smithsonian Center for Materials Research and Education in Suitland should remain exempt from having to compete for federal research dollars because they make unique contributions to the scientific and museum communities Three other Smithsonian research programs should continue to receive federal funding since they are performing science of the highest quality and already compete for much of their government research money

Nuclear Jihadist Douglas Frantz, Catherine Collins, 2007-12-03 Major investigative nonfiction on one of the most important stories of our time the spread of nuclear weapons written by two award winning journalists who for years have followed the trail of the world s most notorious arms dealer The world has entered a second nuclear age For the first time since the end of the Cold War the threat of nuclear annihilation is on the rise Should such an assault occur there is a strong likelihood that the trail of devastation will lead back to Abdul Qadeer Khan the Pakistani father of the Islamic bomb and the mastermind behind a vast clandestine enterprise that has sold nuclear secrets to Iran North Korea and Libya Khan s loose knit organization was and still may be a nuclear Wal Mart selling weapons blueprints parts and the expertise to assemble the works into a do it yourself bomb kit Amazingly American authorities could have halted his operation but they chose instead to watch and wait Khan proved that the international safeguards the world relied on no longer worked Journalists Douglas Frantz and Catherine Collins tell this alarming tale of international intrigue through the eyes of the European and American officials who suspected Khan tracked him and ultimately shut him down but only after the nuclear genie was long out of the bottle

Nuclear Weapons Proliferation in the Next Decade Peter Lavoy, 2020-09-23 The intensification of the Iranian and North Korean nuclear crises has created new fears that deteriorating security conditions in the Middle East Northeast Asia and other regions will lead additional countries to seek their own nuclear arsenals in the years to come This special issue examines the factors that are likely to shape nuclear weapons proliferation over the next decade The internationally recognized authors of this issue many of whom are prominent scholars and others of whom have held influential governmental positions with responsibility for countering nuclear proliferation bring to light the conditions and events that might drive new countries to pursue nuclear weapons the indicators and cautionary signs that can provide early warning that a country is interested in

building nuclear bombs and the policy and military measures that can be adopted to prevent or at least dissuade new proliferators The introductory chapter develops a novel analytical approach focusing on the role of nuclear myths and mythmakers and the subsequent chapters draw on this approach to help analysts better understand and policy makers better manage nuclear proliferation over the next ten years
