*Palladio and Palladianism* Rudolf Wittkower,1974      **The Collected Essays of Rudolf Wittkower** Rudolf Wittkower,1974      *The Palladian Landscape: Geographical Change and Its Cultural Representations in Sixteenth-Century Italy* , While the themes sources and materials of The Palladian Landscape span a range of disciplinary interests from art and architectural studies economic social and environmental history to philosophy and Renaissance humanism Denis Cosgrove seeks to provide a geographical interpretation of a region of northern Italy in the specific period of the late Renaissance However he goes much further using the thoughts designs and commissions of the architect Palladio as the central thread to weave a picture of a place Venice that is in a period of crisis as it seeks to survive a transition from a maritime power hinterland to a new land based terraferma As a cultural geographer he seeks to understand how groups come to terms with and transform their material environments and he therefore pays special attention to the intellectual forces and spiritual sensibilities that empower those groups as well as to the economic social and environmental constraints with which they have to contend Although these two broad realms of human experience are often studied separately Cosgrove brings them together in this study He uses the leitmotif of architecture and specifically the work of Andrea Palladio to describe a localized transformation of the natural world into a landscape of expression of cultural meaning Beyond this leitmotif the work adopts an essay structure in which each chapter stands somewhat separately as a spatial narrative It moves from the imperial city of Venice into its Italian territories and thence from city to rural landscape to specific country estates Having described localized transformations of urban and rural landscapes Cosgrove then expands the scale again to consider hydrological engineering in the Venetian territories and some of the techniques involved in surveying and mapping the landscape These return the reader to the more global view of a Venetian mentalit coming to terms with a changing geographical and historical world map

Dalzell Jr., Lee Baldwin Dalzell, 2000-02-24 George Washington's Mount Vernon brings together for the first time the details of Washington's 45 year endeavor to build and perfect Mount Vernon In doing so it introduces us to a Washington few of his contemporaries knew and one little noticed by historians since Here we meet the planter patriot who also genuinely loved building a man passionately human in his desire to impress on his physical surroundings the stamp of his character and personal beliefs As chief architect and planner of the countless changes made at Mount Vernon over the years Washington began by imitating accepted models of fashionable taste but as time passed he increasingly followed his own ideas Hence architecturally as the authors show Mount Vernon blends the orthodox and the innovative in surprising ways just as the new American nation would Equally interesting is the light the book sheds on the process of building at Mount Vernon and on the people slave and free who did the work Washington was a demanding master and in their determination to preserve their own independence his workers often clashed with him Yet as the Dalzells argue that experience played a vital role in shaping his hopes for the future of American society hope that embraced in full measure the promise of the revolution in which he had led his fellow citizens George Washington's Mount Vernon thus compellingly combines the two sides of Washington's life the public and the private and uses the combination to enrich our understanding of both Gracefully written with more than 80 photographs maps and engravings the book tells a fascinating story with memorable insight      **Palladian Style in Canadian**

**Architecture** Nathalie Clerk, 1984      *Nationalism and Architecture* Darren Deane, Sarah Butler, 2016-12-05 Unlike regionalism in architecture which has been widely discussed in recent years nationalism in architecture has not been so well explored and understood However the most powerful collective representation of a nation is through its architecture and how that architecture engages the global arena by expressing defining and sometimes negating a sense of nation in order to participate in the international world Bringing together case studies from Europe North and South America the Middle East Africa Asia and Australia this book provides a truly global exploration of the relationship between architecture and nationalism via the themes of regionalism and representation various national building projects ethnic and trans national expression national identities and histories of nationalist architecture and the philosophies and sociological studies of nationalism It argues that nationalism needs to be trans national as a notion to be critically understood and the geographical scope of the proposed volume reflects the continuing relevance of the topic within current architectural scholarship as an overarching notion The interdisciplinary essays are coherently grouped together in three thematic sections Revisiting Nationalism Interpreting Nationalism and Questioning Nationalism These chapters offer vignettes of the protean appearances of nationalism across nations and offer a basis of developing wider knowledge and critically situated understanding of the question beyond a singular nation's limited bounds      **The Palladian Revival** John Harris, Professor of

Bioethics and Applied Philosophy Director of the Center for Social Ethics and Policy John Harris,1994-01-01 In 1726 Richard Boyle 3rd Earl of Burlington built an addition to his modest country house on the river Thames at Chiswick The structure was a free standing villa which is the subject of this book The author explores the villa s architectural inspiration and the evolution of its design

**Articulating British Classicism** Elizabeth McKellar,2017-07-05 Whereas the past decades have seen a profound reconsideration of eighteenth century visual culture the architecture of that century has undergone little evaluation Its study unlike that of the early modern period or the twentieth century has continued to use essentially the same methods and ideas over the last fifty years Articulating British Classicism reconsiders the traditional historiography of British eighteenth century architecture as it was shaped after World War II and brings together for the first time a variety of new perspectives on British classicism in the period Drawing on current thinking about the eighteenth century from a range of disciplines the book examines such topics as social and gender identities colonialization and commercialization notions of the rural urban and suburban as well as issues of theory and historiography Canonical constructions of Georgian architecture are explored including current evaluations of the continental intellectual background the relationship with mid seventeenth century Stuart court classicism and the development of the subject in the twentieth century

**The Built Surface: v. 1: Architecture and the Visual Arts from Antiquity to the Enlightenment** Christy Anderson,Karen Koehler,2017-11-22 This title was first published in 2002 Since antiquity through to the present architecture and the pictorial arts paintings photography graphic arts have not been rigidly separated but interrelated the one informing the other and establishing patterns of creation and reception In the Classical tradition the education of the architect and artist has always stressed this relationship between the arts although modern scholarship has too often treated them as separate disciplines These volumes explore the history of this exchange between the arts as it emerged from classical theory into artistic and architectural practice Issues of visual representation perspective allegory site specificity ornamentation popular culture memorials urban and utopian planning and the role of treatises manifestos and other theoretical writings are addressed as well as the critical reaction to these products and practices This title represents a variety of methods approaches and diatectical interpretations cases where architecture informs the themes and physical space of pictures or pictorial concerns inform the design and construction of the built environment The exchanges between architecture and pictures explored by these authors are found to be in all cases ideologically potent and therefore significantly expressive of their respective social political and intellectual histories

Art and Magic in the Court of the Stuarts Vaughan

Hart,2002-03-11 Spanning from the inauguration of James I in 1603 to the execution of Charles I in 1649 the Stuart court saw the emergence of a full expression of Renaissance culture in Britain Hart examines the influence of magic on Renaissance art and how in its role as an element of royal propaganda art was used to represent the power of the monarch and reflect his apparent command over the hidden forces of nature Court artists sought to represent magic as an expression of the Stuart Kings divine right and later of their policy of Absolutism through masques sermons heraldry gardens architecture and processions As such magic of the kind enshrined in Neoplatonic philosophy and the court art which expressed its cosmology played their part in the complex causes of the Civil War and the destruction of the Stuart image which followed in its wake
