related violence is generally associated with crimes committed by people from the Middle East and adjacent areas. Perpetrators sometimes justify their deeds saying they had to restore their honor. Theorists have argued that men from these populations exclusively correlate honor with the behaviour of their womenfolk which they use as a pretext to further oppress and dominate women. Due to large scale migration western societies have become acquainted with honor related violence and honor killings. In this book Robert Ermers addresses a number of questions related to honor related violence including the use of predominantly negative frames regarding the cultural and social background of non westerners and immigrants. In many publications including the press crimes committed by non western individuals are often attributed to their cultural background rather than specific contexts or circumstances in contrast to western cases. Vague and insufficiently defined concepts such as honor and culture strongly contribute to this bias. Honor Related Violence deals with honor and honor related violence their background and contexts what honor is and what it is not. It examines stigma in relation to honor and based upon stigma research reliably explains analyses and predicts honor related violence. The book argues that people all over the world can be stigmatized excluded and ostracized when they commit misbehavior and therefore find themselves in a state of dishonor which can lead to honor related violence. A timely intervention into the psychology of honor related violence this is an essential resource for students and researchers in the fields of social psychology sociology law criminology and anthropology.

**The Objectives of Islamic Law** Rume Ahmed, Idris Nassery, Muna Tatari, 2020-07-06. Scholars, thinkers and activists around the world are paying increasing attention to a legal reform method that promises to revolutionize the way people think about Islamic law. Known as The Objectives of the Shari'ah, the theory offers a way to derive and apply new Islamic laws using an ancient methodology. The theory identifies core objectives that underlie Islamic law and then looks at inherited Islamic laws to see whether they meet those objectives. According to the maqasid theory, historical Islamic laws that meet their objectives should be retained and those that do not, no matter how entrenched in practice or embedded in texts, should be discarded or reformed. Recently several scholars have questioned the maqasid theory, arguing that it is designed not to reform laws but to support existing power structures. They warn that adopting the maqasid wholesale would set the reform project back, ensuring that inherited Islamic laws are never fully reformed to agree with contemporary values like gender egalitarianism and universal human rights. The Objectives of Islamic Law: The Promises and Challenges of the Maqasid al-Shari'ah captures the ongoing debate between proponents and skeptics of the maqasid theory. It raises some of the most important issues in Islamic legal debates today and lays out visions for the future of Islamic law.
