Monthly Bulletin Indiana State Board of Health, 1928 **Being Fair with Kids** Jim Dueck, 2020-02-10 The current practice of having children begin school within a twelve month cohort is unfair but can be ameliorated by incorporating a dual entry system Such a reform effort will dramatically reduce failure improve student achievement at all levels while reducing expenditures Many students are penalized from maximizing their academic potential simply by being born at the

wrong time of the year Not only is there a significant decline in achievement for students born in the second half of the year but they also experience higher rates of failure which negatively impacts self esteem and reduces future success Meanwhile more capable students experience unfairness because of the school s extraordinary effort at helping their failing students With so much focus on the weak many strong students are held back from achieving their potential Parents agonize over when to begin their child s formal education but lack data for making informed decisions Educators understand the issue intuitively but decision makers lack data for justifying reform These informational needs are now available Arts and Creativity in East and Southeast Asian Preschools Alfredo Bautista,2025-08-20 This book is based on the theoretical notion of glocalization which is understood as the hybridization of global and local perspectives It brings together contributions from Asian preschool stakeholders specializing in arts and creativity who present glocal pedagogical practices in the art forms of visual arts music drama dance and in multi modal activities that integrate multiple art forms The chapters provide Asian preschool teachers with insights on how to design implement and or evaluate high quality classroom activities These insights help maximize children s creativity while being realistic and suitable to local preschools as well as aligned with the expectations values and norms of traditional Asian societies The chapters are primarily oriented to practice and also include conceptual and or theoretical elaborations intended to ground and justify teachers pedagogical choices The various chapters also enhance teachers pedagogical repertoires to benefit children s creative learning experiences in the arts This edited book serves as a valuable guide for preschool stakeholders in Asia including teachers and childcare practitioners both pre and in service school leaders head teachers area coordinators vice principals principals teacher educators curriculum designers consultants professional development providers and educational researchers in arts and creativity Lesson Plans for Teachers in Nature-study Agriculture Alice Jean Patterson,Lora M.
