Plurality of Worlds is preceded by two related texts that Kuhn publicly delivered but never published in English his paper Scientific Knowledge as Historical Product and his Shearman Memorial Lectures The Presence of Past Science An introduction by the editor describes the origins and structure of The Plurality of Worlds and sheds light on its central philosophical problems Kuhn's aims in his last writings are bold He sets out to develop an empirically grounded theory of meaning that would allow him to make sense of both the possibility of historical understanding and the inevitability of incommensurability between past and present science In his view incommensurability is fully compatible with a robust notion of the real world that science investigates the rationality of scientific change and the idea that scientific development is progressive
