based lesson plans tests and formative assessments Reach every learner regardless of understanding level or learning style Integrate technology into class time for more engaging math lessons Proceedings of 3rd International Conference on Computing Informatics and Networks Ajith Abraham,Oscar Castillo,Deepali Virmani,2021-03-14 This book is a collection of high quality peer reviewed research papers presented in the Third International Conference on Computing Informatics and Networks ICCIN 2020 organized by the Department of Computer Science and Engineering CSE Bhagwan Parshuram Institute of Technology BPIT Delhi India during 29 30 July 2020 The book discusses a wide variety of industrial engineering and scientific applications of the emerging techniques Researchers from academic and industry present their original work and exchange ideas information techniques and applications in the field of artificial intelligence expert systems software engineering networking machine learning natural language processing and high performance computing **Intelligent Systems and Networks** Thi Dieu Linh Nguyen,Elena Verdú,Anh Ngoc Le,Maria Ganzha,2023-08-19 This book presents Proceedings of the International Conference on Intelligent Systems and Networks ICISN 2023 held at Hanoi in Vietnam It includes peer reviewed high impact research manuscripts that highlight the work based on Intelligent System and Networks The book presents ongoing research outcomes results and cutting edge works which are of importance to professionals and academics researchers It covers topics such as Computational Intelligence in Language and Speech Processing Software development methods Wireless Communications and Signal Processing IoT and Sensor Embedded Systems etc

Content-Based Image Classification Rik Das,2020-12-17 Content Based Image Classification Efficient Machine Learning Using Robust Feature Extraction Techniques is a comprehensive guide to research with invaluable image data Social Science Research Network has revealed that 65% of people are visual learners Research data provided by Hyerle 2000 has clearly shown 90% of information in the human brain is visual Thus it is no wonder that visual information processing in the brain is 60 000 times faster than text based information 3M Corporation 2001 Recently we have witnessed a significant surge in conversing with images due to the popularity of social networking platforms The other reason for embracing usage of image data is the mass availability of high resolution cellphone cameras Wide usage of image data in diversified application areas including medical science media sports remote sensing and so on has spurred the need for further research in optimizing archival maintenance and retrieval of appropriate image content to leverage data driven decision making This book demonstrates several techniques of image processing to represent image data in a desired format for information identification It discusses the application of machine learning and deep learning for identifying and categorizing appropriate image data helpful in designing automated decision support systems The book offers comprehensive coverage of the most essential topics including Image feature extraction with novel handcrafted techniques traditional feature extraction Image feature extraction with automated techniques representation learning with CNNs Significance of fusion based approaches in enhancing classification accuracy MATLAB codes for implementing the techniques Use of the Open Access data mining tool

WEKA for multiple tasks The book is intended for budding researchers technocrats engineering students and machine learning deep learning enthusiasts who are willing to start their computer vision journey with content based image recognition The readers will get a clear picture of the essentials for transforming the image data into valuable means for insight generation Readers will learn coding techniques necessary to propose novel mechanisms and disruptive approaches The WEKA guide provided is beneficial for those uncomfortable coding for machine learning algorithms The WEKA tool assists the learner in implementing machine learning algorithms with the click of a button Thus this book will be a stepping stone for your machine learning journey Please visit the author s website for any further guidance at <https://www.rikdas.com>

Proceedings of the Trends in Electronics Conference ,1999 *Efficient Artificial Intelligence (AI) in Ophthalmic Imaging*
Yanda Meng, Yalin Zheng, Haoyu Chen, Meng Wang,2025-01-07 Ophthalmic imaging techniques such as optical coherence tomography OCT OCT angiography OCTA fundus photography and fluorescein angiography generate vast amounts of visual data allowing for a detailed examination of the eye s structure and function These images provide invaluable insights into the presence and progression of various ocular diseases such as age related macular degeneration diabetic retinopathy and glaucoma While ophthalmologists possess expertise in interpreting these images the manual analysis of large datasets can be time consuming prone to errors and subject to inter observer variability Artificial Intelligence AI based approaches have emerged as promising tools to augment the diagnostic capabilities of ophthalmologists enabling faster and more accurate assessments This proposal aims to explore and develop innovative approaches including but not limited to transfer learning activate learning semi supervised learning weakly supervised learning meta learning graph neural networks multimodal learning and federated learning etc to enhance the efficiency and effectiveness of AI in ophthalmic imaging This collection aims to promote research that improves the accuracy scalability interpretability and generalization of AI models for ophthalmic imaging This Research Topic welcomes manuscripts on the following themes Annotation efficient AI Manual data annotation is a labor intensive and time consuming process that often poses challenges in terms of scalability cost and subjectivity This topic aims to explore innovative approaches and techniques to develop annotation efficient AI models that can leverage minimal data annotation while maintaining high performance and generalization such as activate learning semi weakly un self supervised learning etc *Morphological Image Analysis* Pierre Soille,2013-03-14 The book is self contained in the sense that it is accessible to engineers scientists and practitioners having no prior experience with morphology In addition most necessary background notions about digital image processing are covered The emphasis being put on the techniques useful for solving practical problems rather than the theory underlying mathematical morphology no special knowledge about set theory and topology is required Nevertheless the book goes well beyond an introduction to mathematical morphology Indeed starting from the fundamental transformations more elaborate methods which have proven their practical usefulness are explained This is achieved through a step by step process pursued until the most recent
