

Duo-Scan:Go[®]

Freeze mode

This function allows you to freeze a live ultrasound image. It will also allow you to review the previous 10 secs of scanning through the app's cine loop functionality. This is good if your sow has run off! All images and clips can be saved in the app by pressing the save icon.

Pregnant mode

When in pregnant mode, short pressing the power button will increment the pregnant count. This allows the number of pregnant sows to be easily recorded.

Non-pregnant mode

When in non pregnant mode, short pressing the power button will increment the non-pregnant count. This allows the number of non-pregnant sows to be easily recorded.

Saved images

All images and video clips are stored in the smart device's photo and video gallery.

Care & maintenance

We have built the Duo-Scan:Go to be rugged and water resistant. It does however contain fragile sensitive electronics.

Duo-Scan:Go housing is water resistant enough for gentle washing and rinsing. It will not withstand powerful jets of water (e.g. tap full on or hosing it down).

Charging

The scanner is charged via a wireless induction plate. To charge the scanner place it on the plate, with the charging symbol facing down. The scanner should be charged in a cool environment, ideally around 20 °C. When the LED turns off the charger is fully charged. Duo- Scan:Go is compatible with all WPC Qi-v1.2 compliant wireless chargers and has been certified using chargers with an output up to 5V/1A and a charge frequency of 110kHz to 190kHz.
