

## **OPERATIONS MANAGEMENT**

Operations management is a main function in each and every organization. Operations management is found in all organizations be it in the service or production, or in the public, private or voluntary sectors (Render and Heizer 2011, p. 36). Operations management is associated with production, creation and distribution of goods or services. Operations management plays an important role in every organization simply because it manages all the actual performance of the organization. Operations management operates and designs systems for production. These systems are the systems required to get work done. The movies people watch, the food they eat, the shops they go shopping and even the books the people read are all results of operations management (Russell and Taylor III 2003, p 4). Operation management is practically found in every part of any organization. The operation managers ensure quality, design systems, and do the production of goods and delivering of services. They solve problems, innovate and reengineer process. It is more of planning than controlling. This is usually because the operations management controls and plans all the activities that are conducted in the organization.

Operations management is usually considered as the process of transformation. Inputs such as materials, capital, management, machines and labor are changed into outputs which are services and goods. Operations management tries to ensure that transformation is efficiently performed to produce more outputs than the inputs have been used. This is to show that the transformation process creates value. The chain starting from the inputs to the transformation to the output process is the main

Total Quality Management and Just-in-Time Purchasing Hale Kaynak,2013-06-17 This study investigates the relation of total quality management TQM and just in time purchasing JITP with respect to firms performance based on theories from operations management organization theory strategic management and marketing U S companies have implemented TQM and JITP techniques to improve their global competitive position The lack of empirical research on how these techniques effect firms performance makes it necessary to explain their strategic values as management innovations In this study a cross sectional mail survey was used with the target population of firms in the continental United States that have implemented either technique or both The

results indicate that the extent of TQM and JITP implementation positively correlates with a firm's performance. Furthermore, the relation between JITP and financial and market performance is more significant in those industries that face high as opposed to low foreign competition. In this study, the validity of findings was assessed in four parts: statistical conclusion, internal construct, and external validity. Each validity type is defined and its threats are discussed. Based on the findings, a revised research model is offered. The author also notes likely avenues of future research for theorists and practitioners.

Introduction to Management John R. Schermerhorn, 2011. Completely updated and revised this eleventh edition arms managers with the business tools they'll need to succeed. The text presents managerial concepts and theory related to the fundamentals of planning, leading, organising, and controlling with a strong emphasis on application. It offers new information on the changing nature of communication through technology. Focus is also placed on ethics to reflect the importance of this topic, especially with the current economic situation. This includes all new ethics boxes throughout the chapters. An updated discussion on the numerous legal law changes over the last few years is included as well. Managers will be able to think critically and make sound decisions using this text because the concepts are backed by many applications, exercises, and cases. *New York: Army National Guard, Education Services Handbook*. New York (State): Army National Guard, 1986.
