## 3. Teaching through problem-solving

- Learners learn maths through real contexts, problems, situations and models
- The context and model allows learners to construct meaning about the concept
- Opposite of teaching for problem-solving approach

most ideal approach

## The role of the teacher in problem solving

- The teacher's task is no less demanding because learners do the maths – it is actually very demanding.
- Teachers need to pick out high-quality tasks that will allow learners to learn the content by finding their own strategies and solutions.
- Teachers need to ask well-thought-out questions that will allow learners to modify and relate their strategies.
- Teachers need to listen to learners' responses and observe their work and, at the spur of the moment, determine how to expand and formalise learners' thinking.
