Descripci n Resumen Ingl s The main objective of this doctoral thesis is to show the influence that the development of biology had on philosophy at the dawn of Modernity and especially on G W Leibniz I contend that a correct understanding of his philosophical thought cannot be reached without taking into account the influence it received from the life sciences I also try to test this interpretive key with some of the central concepts of Leibnizian thought The thesis deals with biology and metaphysics at the dawn of Modernity I believe that biology profoundly marked the development of metaphysics at the beginning of Modernity This was the case for many authors for example the Van Helmont or Diderot but the most obvious and influential case was that of Leibniz whom we will deal with in more detail throughout the work Although Leibniz has to be interpreted in the context of a time his in which this influence of biology on metaphysics occurred in a generalized way we cannot help but contemplate and occupy ourselves with the dominant position in the XVII XVIII centuries Cartesian Mechanism We wanted to do in this research work a resignification and reinterpretation of Leibniz from a vitalist approach collecting that other biologist and doctor Leibniz in constant debate with numerous philosophers of the moment followers of more mechanistic positions The subject of this doctoral dissertation is based on the work developed in the doctoral dissertation on this subject as well which I entitled G W Leibniz from biology to metaphysics Nuevos Modelos Tecnoeducativos Enrique Ruiz-Velasco Sánchez & Josefina Bárcenas López,2022-12-30 *José Celestino Mutis and Newtonianism in New Granada, 1762-1808* Sebastián Molina-Betancur,2023-06-17 This book presents the process of circulation and adoption of Newtonianism in the Viceroyalty of New Granada modern day Colombia in the eighteenth century by examining Jos Celestino Mutis s lectures at the Colegio del Rosario between the 1760s and 1770s Mostly famous for his botanical activities as director of the botanical expedition Mutis lectured the first course of mathematics ever created in New Granada on his arrival in Bogota in 1762 in which he included several lectures on physics that encompassed multiple aspects of his interpretation of Newton s experimental physics *Color. La muerte de la naturaleza Carolyn Merchant, 2023-06-01 A inicios de los años sesenta Carolyn Merchant una joven científica investigadora estadounidense fascinada con la física y las matemáticas estudia el surgimiento de la ciencia moderna mientras participa en las luchas ecologistas contra los pesticidas y busca el modo de compatibilizar la carrera académica con la crianza de sus hijos La muerte de la naturaleza publicado por primera vez en 1980 y recién ahora traducido al español es el libro pionero que articula con maestría esas tres preocupaciones el rol de la ciencia el ambientalismo y el feminismo en una deslumbrante reconstrucción histórica y crítica Desde la Antigüedad hasta el Renacimiento la imagen de la tierra como un organismo vivo y una madre nutricia constituye un marco cultural y típico para los seres humanos nadie mata fácilmente a una madre ni escarba en sus entrañas en busca de oro Carolyn Merchant analiza cómo entre los siglos XVI y XVII esa imagen de un cosmos orgánico que tenía en su centro a una tierra viva y femenina dio paso a una visión mecanicista del mundo La naturaleza se volvió una realidad salvaje y caótica que era necesario neutralizar y finalmente una materia inerte disponible para ser dominada y controlada A medida que avanzaban los procesos de mercantilización e industrialización de la mano de la Revolución Científica moderna y los cambios tecnológicos empezaron a gestarse nuevas imágenes de la naturaleza y de la mujer como pasivas y subordinadas al engranaje de las máquinas y al imperativo del progreso económico a cualquier costo Esta obra fundacional del ecofeminismo con enorme impacto dentro y fuera de la academia recupera también las utopías y las tradiciones que fueron dejadas de lado Su apuesta mayor y aún vigente no es volver a un mundo premoderno ni defender una mirada esencialista de la naturaleza y de las mujeres sino preguntarse a la luz de una historia llena de tensiones cómo construir una visión del mundo que guíe a los ciudadanos del siglo XXI hacia una vida sostenible y sin opresión de género Este clásico de Carolyn Merchant es una excelente oportunidad para recrear un horizonte en el que feminismo y ecologismo se potencien Maristella Svampa
