Oracle Application Server 10g Release 2 Documentation:

Oracle Application Server 10g Erin Mulder, Rob Harrop, Jan Machacek, Michael Wessler, 2013-11-09 Oracle Application Server 10g J2EE Deployment and Administration focuses on the latest version of Oracle's fully J2EE certified application server previously called Oracle9iAS. Oracle Corporation is aggressively attacking this market with a new low cost version of the server as well as a program to move BEA customers onto Oracle free of charge. Adoption interest is growing rapidly amidst favorable reports regarding performance and reliability. Deploying and configuring J2EE applications are some of the trickiest processes in J2EE development and they unfortunately receive scant attention in general J2EE texts. This book is a focused no frills guide to getting J2EE applications up and running on 10g. It covers Oracle's J2EE container OC4J available free of charge for development purposes in full detail. It moves on to explain how to best configure and use the various enterprise level features that come with the commercial editions. This is the book for anyone wanting to stay ahead in the world of Oracle's application servers.

[OCA Oracle Application Server 10g Administration I Study Guide](#) Bob Bryla, April Wells, 2006-12-06 Complete coverage of the exam objectives, hands on exercises, review questions and more. The book features an interactive CD ROM including the Sybex Test Engine with chapter review questions and bonus exams, a series of flash cards that can be used on a PC or handheld and an e version of the book. Note: CD ROM, DVD and other supplementary materials are not included as part of eBook file.

This book also explains how the underlying tables store the data generated by Workflow and how to perform the setups required for a few of the most commonly used Oracle Workflows.
