BPM Everywhere Nathaniel Palmer, Scott Francis, Peter Whibley, Surendra Reddy, Peter Fingar, Dr Setrag Khoshafian, Larry Hawes, Charles Webster, Vinay Mummigatti, Roy Altman, James Taylor, Joseph B. Lail, Keith D. Swenson, Rudiger Pryss, Stuart Chandler, David RR Webber, Mark Casey, Wil van der Aalst, Dr Anne Rozinat, Matthias Walter, Mara Nikolaidou, Alberto Manuel, 2019-10-23 We are entering an entirely new phase of BPM the era of BPM Everywhere or BPME BPME represents the strategy for leveraging not simply surviving but fully exploiting the wave of disruption facing every business over the next 5 years and beyond Without question one of the single most disruptive events in the last decade was the introduction of the smartphone Consider for a moment how great of an impact this has had on the relationship between businesses and their customers Not even the emergence of the Web and Internet based digital native business models can compare with the level of intimacy now available with your customers In the era of the Internet of Things where smart homes appliances cars phones virtually imaginable devices are all connected BPM must and will be everywhere As Peter Whibley discusses in The Internet of Things Will Be Invisible by 2025 there are expected to be more than 26 billion or more connected devices In the chapter Digital Prescriptive Maintenance Disrupting Manufacturing through IoT Big Data and Dynamic Case Management Dr Setrag Khoshafian introduces the 4 Vs of thing data specifically Volume Velocity Variety and Value From monitors and remote sensors to appliances and vehicles to tens of billions of other things connected devices are generating meaningful and informative data that would easily overwhelm any human being but collectively they present critical context about processes and the state of operations Big Data has never been so large nor presented such an acute role within enterprises and the processes that drive them BPME as well as traditional BPM methods can already be found at the center of this Its role will grow exponentially Emergent factors such as process mining see chapter Mining the Swarm by Keith Swenson et al will be critical for uncovering engagement patterns and the need for process management platforms to coordinate interaction and control of smart devices It is intelligent BPM that is expanding the window of what can be automated by enabling adaptable automation The mobile strategies in far too many organizations seem to be the building of apps that presume that customers will use their smartphones like mini laptops This avoids the fact that we now have a level of intimacy with our customer we've never had before As discussed in the chapter BPM to Go Supporting Business Processes in a Mobile and Sensing World our customers are carrying around a device that offers a range of capabilities unlike any laptop A smartphone produces volumes of meaningful data about our customers think about the 4Vs and is able to interact with that customer in ways that a laptop never can The growing ubiquity of connectivity always within reach combined with new services and capabilities such as mobile banking is a key part of driving constantly

changing expectations Yet digital disruption is not limited to mobile devices and is in fact disrupting everywhere BPM is otherwise found and why BPM everywhere is becoming the new normal *Business Process Management Workshops* Stefanie Rinderle-Ma, Shazia Sadiq, Frank Leymann, 2010-03-17 This book constitutes the thoroughly refereed post workshop proceedings of eight international workshops held in Ulm Germany in conjunction with the 7th International Conference on Business Process Management BPM 2009 in September 2009 The eight workshops were on Empirical Research in Business Process Management ER BPM 2009 Reference Modeling RefMod 2009 Business Process Design BPD 2009 Business Process Intelligence BPI 2009 Collaborative Business Processes CBP 2009 Process Oriented Information Systems in Healthcare ProHealth 2009 Business Process Management and Social Software BPMS2 2009 Event Driven Business Process Management edBPM 2009 The 67 revised full papers presented were carefully reviewed and selected from numerous submissions Innovations in Enterprise Information Systems Management and Engineering Michael Felderer, Felix Piazzolo, Wolfgang Ortner, Lars Brehm, Hans-Joachim Hof, 2016-04-02 This volume presents the revised and peer reviewed contributions of the ERP Future 2015 conference held in Munich Germany on November 16 17 2015 The ERP Future 2015 Research conference is a scientific platform for research on enterprise information systems in general and specifically on core topics like business process management BPM business intelligence BI and enterprise resource planning ERP systems Besides the scientific community the event also addresses businesses developing implementing and using enterprise information systems The 7 full papers and 5 short papers accepted for ERP were selected from 23 submissions The papers consider topics in education in enterprise systems business process management enterprise systems and solution providers and IT trends **Information Technology for Management** Efraim Turban, Carol Pollard, Gregory R. Wood, 2021 Information Technology for Management provides students with a comprehensive understanding of the latest technological developments in IT and the critical drivers of business performance growth and sustainability Integrating feedback from IT managers and practitioners from top level organizations worldwide the International Adaptation of this well regarded textbook features thoroughly revised content throughout to present students with a realistic up to date view of IT management in the current business environment This text covers the latest developments in the real world of IT management with the addition of new case studies that are contemporary and more relevant to the global scenario It offers a flexible student friendly presentation of the material through a pedagogy that is designed to help students easily comprehend and retain information There is new and expanded coverage of Artificial Intelligence Robotics Quantum Computing Blockchain Technology IP Intelligence Big Data Analytics IT Service Management DevOps etc It helps readers learn how IT is leveraged to reshape enterprises engage and retain customers optimize systems and processes manage business relationships and projects and more Manual de Inteligența Afacerilor Daniela Ioana Alexandru, 2010-11-26 Utilizate pe scară largă în vestul Europei și în Statele Unite ale Americii țara noastră se află într-o fază incipientă în ceea ce privește

utilizarea de solutii informatice pentru inteligenta afacerilor BI Business Intelligence si de management al performantelor intreprinderii BPM Business Performance Management Cartea are ca scop promovarea ideilor si conceptelor BI si de BPM in companiile romanesti si este organizata sub forma de manual care sa ofere o imagine completa asupra domeniului
