Understanding Geology Through Maps Graham Borradaile, 2014-07-16 Understanding Geology through Maps guides young professional geologists and students alike in understanding and interpreting the world's dynamic and varying geological landscapes through the liberal use of visual aids including figures maps and diagrams This highly visual reference introduces the skills of interpreting a geological map and relating it to the morphology of the most important types of geological structure Thoroughly revised and with more international examples it is ideal for use by students with a minimum of tutorial supervision Maps of geological structures provide all of the realism of a survey map without the huge amount of data often present so readers can develop or hone their skills without becoming overwhelmed or confused In particular

Miall,2010-06-09 It has been more than a decade since the appearance of the First Edition of this book Much progress has been made but some controversies remain The original ideas of Sloss and of Vail building on the early work of Blackwelder Grabau Ulrich Levorsen and others that the stratigraphic record could be subdivided into sequences and that these sequences store essential information about basin forming and subsidence processes remains as powerful an idea as when it was first formulated The definition and mapping of sequences has become a standard part of the basin analysis process The main purpose of this book remains the same as it was for the first edition that is to situate sequences within the broader context of geological processes and to answer the question why do sequences form Geoscientists might thereby be better equipped to extract the maximum information from the record of sequences in a given basin or region Tectonic climatic and other mechanisms are the generating mechanisms for sequences ranging over a wide range of times scales from hundreds of millions of years to the high frequency sequences formed by cyclic processes lasting a few tens of thousands of years *Journal of the Assembly, Legislature of the State of California* California.
