## **Sekem A Sustainable Community In The Egyptian Desert:**

**Sekem** Ibrahim Abouleish, 2005 The Egyptian desert can be a hostile place Yet in 1977 Dr Ibrahim Abouleish founded a new agricultural and social settlement on seventy hectares of desert land in Belbes 60 km north east of Cairo The Sekem initiative was born Dr Abouleish's goals were to build a new type of community His vision was for a farm which grew biodynamic crops and plants out of the harsh desert sand Where the workers and residents were given holistic primary health care Where their children were well educated in the sciences A place which could sell its wares and be self sufficient and self sustaining A place where Islamic religion and Western technology could come together in harmony Nearly thirty years later and Sekem has gone from strength to strength In 1981 it shipped its first medicinal herbs to the USA by 2004 it oversaw a network of over 800 farms across Egypt and the Sudan producing high quality organic crops herbs fruits and vegetables Its mobile health units work with local rural populations and it has brought about real social change This is the story of Sekem the original vision the challenges and hard work and the eventual successes in Ibrahim Abouleish's own words Stunningly illustrated with colour photographs throughout **The Sekem Effect** HELMY. ARLT ABOULEISH (CHRISTINE.), Christine Arlt, 2025-05-29

catalyst for environmental activism helping to bring to life many modern ecological practices such as organic farming community supported agriculture and green banking Yet the spiritual practice of anthroposophy remains unknown to most environmentalists A historical and ethnographic study of the environmental movement *Eco Alchemy* uncovers for the first time the profound influences of anthroposophy and its founder Rudolf Steiner whose holistic worldview rooted in esoteric spirituality inspired the movement Dan McKanan shows that environmentalism is itself a complex ecosystem and that it would not be as diverse or transformative without the contributions of anthroposophy *Integral Economics* Ronnie Lessem, Alexander Schieffer, 2016-05-23 Why on earth is economics perceived to come in only one or at best two different a cultural if not a moral guises There are real and many alternatives to the economic mainstream The trouble is of course that they are hidden from us In *Integral Economics* Ronnie Lessem and Alexander Schieffer pave the way for a sustainable approach to economics building on the richness of diverse economic approaches from all over the globe By introducing the most evolved economic perspectives and bringing them into creative dialogue they argue that neither individual enterprises nor wider society will be transformed for the better without a new economic perspective Here they introduce a comprehensive framework based on the same Four Worlds model that is applied to enterprise and research in their earlier works Given the richness of even mainstream economic theory reviewed in this book let alone the variety of alternative approaches introduced it is frustrating that policymakers and business practitioners are impoverished by a lack of apparent economic choice between a seemingly failing capitalism and an already failed communism The villains of the piece in relation to this lack of choice are not so much the financial community and governments though they do have much to answer but the schools of economics and the business schools that have created the very social ethos the philosophical principles and the mathematical models that influence events *Integral Economics* is partly addressed to academics and students in those very schools who have either realized the error of their ways or less dramatically are curious to explore whether our businesses and communities could be run in a different way It will be welcomed by informed senior practitioners eager to understand the current rethink of economic theory and practice and to discover how to position themselves their organizations and their society within a new framework *Integral Community* Mr Paul Chidara Muchineripi, Mr Steve Kada, Professor Ronnie Lessem, 2013-01-28 *Integral Community* moves the transformation journey for enterprises and society on from the stages covered in earlier books in Gower's Transformation and Innovation Series which describe a new macro economic framework and which have examined alternative development with different local communities bringing wide cultural perspectives to practical implementation of authentic or integral development Here the authors argue that there are two major fields of force prevailing in today's world The one reflects our common heritage whereby East and West North and South are coming ever closer together the global commons The other reflects local and national singularity where the notion of feeding off ancient local heritage and talent is key They also identify four different culturally laden worldviews as Southern humanistic Eastern

holistic Northern rational and Western pragmatic The enterprise and social innovation in Africa with which Lessem s co authors are involved provides an object lesson in the sort of differentiation and integration needed in order to operate socio economically with local identity and global integrity It provides in this case a Southern worldview background against which to examine communally based self sufficiency culturally based developmental economy knowledge based social economy and finally the move towards what the authors describe as a living economy All illustrated through a rural case Chinyika with which they have been intimately involved whereby 100 000 have become self sufficient over the past five years Integral Community should be read by academics and students of business economics development studies and agriculture and by policy makers particularly those concerned with the developing world in general and Africa in particular **Egypt's**

**Nhakanomics: Harvesting Knowledge and Value for Re-generation Through Social Innovation** Ronnie Lessem, Munyaradzi Mawere, 2019-08-02 Nhakanomics Harvesting Knowledge and Value for Re generation Through Social Innovation is a radical departure from the commonly held belief that neo liberal economics from the US and the West is universal and is the only solution to underdevelopment and poverty throughout the world Instead the book teases out and theorises the intellectually rutted terrain of development studies and neo liberal economics from a decolonial Pan Africanist perspective Following a path of social innovation with perspectives drawn from social anthropology economics and business and management studies Nhakanomics is a unique socio economic approach applicable in the Global South and in Southern Africa in particular The study argues that the process and substance of nhakanomics with its pre emphasis on the relational South provides a robust and holistic approach to social innovation and social transformation grounded in relational networks and meshworks The central idea is a call to re GENE rate society through local Grounding and Origination and tapping into local global Emergent Foundations via a newly global Emancipatory Navigation while ultimately culminating in global local transformative Effects in four recursive cycles of re GENE rating C K umusha Culture Communication and Capital after re Constituting Africa the 5Cs With a novel and radical approach the book is an interrogation of neo liberal economics in the Global South As such this book is remarkably handy to students and practitioners in the fields of economics development studies political science science and technology studies business management sociology transformation studies and development related non Governmental Organisations working with grassroots communities

**Integral Dynamics** Ronnie Lessem, Alexander Schieffer, Samuel D. Rima, 2016-05-23 The theory of integral dynamics is based on the view that the development of individual leaders or entrepreneurs requires the simultaneous development of institutions and societies It seeks a specific way forward for each society fundamentally

different from but drawing on its past Nearly every natural science has been transformed from an analytically based approach to a dynamic one now it is time for society and culture to follow suit locally and globally Each culture discipline and person is incomplete and is in need of others in order to develop and evolve This book sets out a curriculum for a new integral trans cultural and trans disciplinary area of study inclusive of but extending beyond economics and enterprise It embraces a trans personal perspective linking self with community enterprise and society and focusing on the vital relationship between local identity and global integrity For the government policy maker the enlightened business practitioner and the student and researcher into economics and enterprise the new discipline is set out here in complete detail by a multi national team of Gower s Transformation and Innovation Series authors Illuminated with examples relating the conceptual to the practical this is a text not for a pre modern modern or even post modern era but for what has been called our trans modern age *Bleeding-Edge Entrepreneurship* João J. Ferreira, Patrick J. Murphy, 2023-01-26 This book contains an Open Access chapter Bleeding edge Entrepreneurship illuminates new possibilities within the domain of business theory and practice expanding entrepreneurship s massive potential to create unexplored physical and virtual realms

**Profits and Sustainability** Geoffrey Jones, 2018-01-26 Are profits and sustainability compatible This book brings unique perspectives to this key debate by exploring the history of green entrepreneurship since the nineteenth century and its spread globally in industries including renewable energy organic food natural beauty ecotourism recycling architecture and finance The book uses the lens of the extraordinary and often eccentric men and women who defied convention and imagined that business could help save the planet rather than consume it The social and religious beliefs that drove many of these individuals are explored as the book looks at how they overcame huge obstacles to execute their strategies The green entrepreneurs seen here are shown to have created new markets and industries and driven innovations in sustainable practices even at times when most consumers and governments marginalized the entire subject The struggles of early pioneers appear to have been rewarded by the growth of environmental awareness among consumers business leaders and others in recent years but the Earth s environmental health continues to deteriorate If profits and sustainability have proved challenging to reconcile the book argues that one reason was how they were both defined **The Agricultural Notebook**

**Digging Deeper** Dietmar Sternad, James J. Kennelly, Finbarr Bradley, 2017-09-08 What is the primary purpose of business The standard answer is making profits but some visionary entrepreneurs and leaders fundamentally disagree Instead of just making money they choose instead to dig deeper and make a difference through creating real value improving the lives of others even as they find deeper meaning in their own These leaders build enterprises that provide identity and a sense of purpose create positive relationships and a place to learn and thrive embed sustainability in all that they do and strive to improve the quality of life of all of their stakeholders Although not their primary focus they also make healthy profits as their unique approach to value creation provides them with a sustainable competitive edge Digging Deeper is a book full of inspiring stories that illustrate that there is an alternative to a myopic and narrow capitalism that trades in inequalities exploitation collective burnout and negative consequences for our shared natural environment Remarkable examples from all over the world vividly demonstrate how enterprises can create real value through focusing on what the authors call the 6 Ls long term orientation lasting relationships local roots limits recognition developing a learning community and taking leadership responsibility seriously in its very best sense Digging Deeper liberates the term value from the tight chains in

which the global financial community has bound it and demonstrates that businesses can contribute to a better life for all if their leaders can go beyond viewing enterprises as single purpose money making machines and develop purpose driven enterprises that create real value for all      Fool's Gold?
