National Recovery Administration,1933     **Codes of Fair Competition** ,1933     Architecture and Justice Jonathan Simon,2016-04-15 Bringing together leading scholars in the fields of criminology international law philosophy and architectural history and theory this book examines the interrelationships between architecture and justice highlighting the provocative and curiously ambiguous juncture between the two Illustrated by a range of disparate and diverse case studies it draws out the formal language of justice and extends the effects that architecture has on both the place of and the individuals subject to justice With its multi disciplinary perspective the study serves as a platform on which to debate the relationships between the ceremonial legalistic administrative and penal aspects of justice and the spaces that constitute their settings The

structure of the book develops from the particular to the universal from local situations to the larger city and thereby examines the role that architecture and urban space play in the deliberations of justice At the same time contributors to the volume remind us of the potential impact the built environment can have in undermining the proper juridical processes of a socio political system Hence the book provides both wise counsel and warnings of the role of public civic space in affirming our sense of a just or unjust society     *The first battle of the Marne, including the operations of the Ourcq* ,1919     **The Significance of the Fine Arts** American Institute of Architects. Operations that Made History Harold Ellis,1996-01-07 A notable surgeon and charismatic teacher himself Professor Ellis has brought together in Operations that made History a fascinating collection of renowned surgical procedures each one

illustrating a different aspect of the history of surgery The first section of the book looks at examples of surgical procedures which have made a major contribution to the history of surgery such as the first successful gastrectomy performed in Vienna over a hundred years ago by Theodor Billroth Some operations whilst in themselves minor procedures have nevertheless had a massive impact on the history of surgery These are grouped together in the second section For example in 1846 during a trivial operation to remove a superficial benign tumour instead of suffering the routine agonies of the knife the patient remained blissfully oblivious throughout This was thanks to William Morton s application of the first anaesthetic to be delivered in a surgical operation In the final part of the book Professor Ellis focuses on the famous patient such as Nelson and George IV Here the tact and ingenuity of the surgeon and the remarkable resilience and eccentricities of the patient are insightfully recounted highlighting both the amusing and the serious side of the surgeon s relationship to a famous patient
