The manual covers a wide range of topics related to ensuring the sustainability of dairy production systems in tropical developing countries such as South and East Asia, Africa and Central America. It also provides guidelines for the best management practices of large scale more intensive dairy systems. While smallholder farms are the major suppliers of milk in the tropics, many larger farms are becoming established throughout the tropics to satisfy the increasing demands for fresh milk. *Blueprints for Tropical Dairy Farming* will be a valuable resource for farmers and stockpeople who want to improve the productive performance of their dairy herds, farm advisers who can assist farmers to achieve this aim, educators who develop training programs for farmers or who train dairy advisers in the basics of dairy production technology and other stakeholders in tropical dairy production such as local agribusiness policy makers and research scientists.
