The International Centre for Advanced Mediterranean Agronomic Studies (CIHEAM) established in 1962 is an intergovernmental organization of 13 countries: Albania, Algeria, Egypt, France, Greece, Italy, Lebanon, Malta, Morocco, Portugal, Spain, Tunisia, and Turkey. Four institutes (Bari, Italy; Chania, Greece; Montpellier, France; and Zaragoza, Spain) provide postgraduate education at the Master of Science level. CIHEAM promotes research networks on Mediterranean agricultural priorities, supports the organization of specialized education in member countries, holds seminars and workshops bringing together technologists and scientists involved in Mediterranean agriculture, and regularly produces diverse publications including the series *Options Méditerranéennes*. Through these activities, CIHEAM promotes North-South dialogue and international co-operation for agricultural development in the Mediterranean region. Over the past decade, the Mediterranean Agronomic Institute of Zaragoza has developed a number of training and research supporting activities in the field of agroecology and sustainability of agricultural production systems. Some of these activities have been concerned with the rational use of pesticides and more particularly with the implementation of integrated control systems in order to gain in efficacy and decrease both the environmental impact and the negative repercussions for the commercialization of agricultural products.

The House of Quality in a Minute Christian N. Madu, 2019-12-01

Quality function deployment (QFD) is an effective tool to help organizations to become more competitive by designing their products and services to satisfy customers' requirements. This book is precise and direct and focuses on the key issues in building the House of Quality, otherwise known as Quality Function Deployment (QFD). By reading this book, the manager understands how to solicit customer requirement information, how design requirements are matched to customer requirements, how priorities of customer needs are established, and how activities are benchmarked. Furthermore, this new edition expands the topic to include process change initiatives on the premise that QFD cannot be achieved if the organization itself is not transformed to achieve customer satisfaction. The manager is guided on how to solve critical problems to achieve customer satisfaction. The book guides the reader to understand how companywide quality activities are related to QFD. This association is often lacking in other presentations that treat QFD as if it is independent of other quality efforts such as process change initiative. The book will therefore include information on related quality initiatives such as Identification of customer needs, Benchmarking,
