International Harvester Trucks Patrick Foster,2015-09-30 Get the entire history of the best trucks on the road The

International Truck and Engine Corporation has built the trucks that have been a staple of both agricultural and industrial trucking for nearly 100 years. *International Harvester Trucks: The Complete History* tells the complete story of the light, medium, and heavy-duty trucks, vans, and station wagons built by International Harvester during over a century of history, starting from the company's early days through its first truck model in 1907 and right up to the present. The focus is firmly on the trucks themselves, including collectible machines such as the Travelall and Scout. Author Patrick R. Foster is one of the world's premier transportation historians. His accessible writing style, illustrated with hundreds of never-before-seen archival photographs, makes this book the best examination of one of the world's most prolific truck manufacturers. 2024-25 RRB

Jain, 2021-09-01. This book explores the transformation of India's relations with Central and Eastern Europe from being a subset of Indo-Soviet relations during the Cold War to the rediscovery and rebuilding of relations with the region almost from scratch in the post-Cold War era. It examines how the combination of Brexit, the rise of China, and India's expanding geo-economic interests in Europe has led the Narendra Modi government to contemplate relations with Central Europe through a more strategic lens and treat the region as an autonomous element within India's foreign policy rather than a footnote of its relations with other great powers. Fulfilling a long-felt gap in existing literature, this volume examines India's political, economic, investment, defence, and cultural relations with the Visegrad Four: the Czech Republic, Hungary, Poland, and Slovakia. It analyzes Indian perceptions of Central Europe and explores prospects of New Delhi's political and economic engagement with the region. The painstakingly compiled appendices on the exchange of bilateral visits and agreements between India and the Visegrad Four would be of immense use as a handy reference to scholars, policy makers, and other interested persons and institutions. Driving Digital Strategy Sunil Gupta, 2018-07-24. Digital transformation is no longer news; it's a necessity.

Despite the widespread threat of disruption, many large companies in traditional industries have succeeded at digitizing their businesses in truly transformative ways. The New York Times, formerly a bastion of traditional media, has created a thriving digital product behind a carefully designed paywall. Best Buy has transformed its business in the face of Amazon's threat. John Deere has formed a data analysis arm to complement its farm equipment business. And Goldman Sachs and many others are using digital technologies to reimagine their businesses. In *Driving Digital Strategy*, Harvard Business School professor Sunil Gupta provides an actionable framework for following their lead. For over a decade, Gupta has studied digital transformation at Fortune 500 companies. He knows what works and what doesn't. Merely dabbling in digital or launching a small

independent unit which many companies do will not bring success. Instead you need to fundamentally change the core of your business and ensure that your digital strategy touches all aspects of your organization: your business model, value chain, customer relationships, and company culture. Gupta covers each aspect in vivid detail while providing navigation tips and best practices along the way. Filled with rich and illuminating case studies of companies at the forefront of digital transformation, *Driving Digital Strategy* is the comprehensive guide you need to take full advantage of the limitless opportunities the digital age provides.

**Your Strategy Needs a Strategy** Martin Reeves, Knut Haanaes, Janmejaya Kumar Sinha, 2015. And they avoid the common frustrations stemming from lack of perceived relevance and engagement around on the strategy process. How you choose and execute the right approach is the focus of this book. From Global BCG strategy experts Martin Reeves, Knut Haanaes, Janmejaya Sinha, and based on the bestselling article in Harvard Business Review, *Your Strategy Needs a Strategy* offers a practical guide to help you to match your approach to strategy to your environment and execute it effectively to combine different approaches for companies which operate in multiple environments and to lead your organization in making better strategic choices. Organizing approaches into five strategic archetypes: Be Big, Be Fast, Be First, Be the Orchestrator, Be Viable, the authors explain the conditions under which each is appropriate when and how to execute each one and how to avoid common strategy traps.

*The Three-Box Solution* Vijay Govindarajan, 2016-04-26. How to Innovate and Execute. Leaders already know that innovation calls for a different set of activities, skills, methods, metrics, mind sets, and leadership approaches. And it is well understood that creating a new business and optimizing an already existing one are two fundamentally different management challenges. The real problem for leaders is doing both simultaneously. How do you meet the performance requirements of the existing business, one that is still thriving while dramatically reinventing it? How do you envision a change in your current business model before a crisis forces you to abandon it? Innovation guru Vijay Govindarajan expands the leader's innovation tool kit with a simple and proven method for allocating the organization's energy, time, and resources in balanced measure across what he calls the three boxes: Box 1: The present. Manage the core business at peak profitability. Box 2: The past. Abandon ideas, practices, and attitudes that could inhibit innovation. Box 3: The future. Convert breakthrough ideas into new products and businesses. The three box framework makes leading innovation easier because it gives leaders a simple vocabulary and set of tools for managing and measuring these different sets of behaviors and activities across all levels of the organization. Supported with rich company examples: GE, Mahindra, Mahindra, Hasbro, IBM, United Rentals, and Tata Consultancy Services, and testimonies of leaders who have successfully used this framework, this book solves once and for all the practical dilemma of how to align an organization on the critical but competing demands of innovation.
