

A Guide on Optometry Billing

Optometry has highly precise documentation and reporting protocols, norms, and regulations to follow, much like any other specialty. All practises must go by these regulations, which are stringent in terms of timelines and accuracy, and insurance companies will call them out if they don't adhere.

Optometry has 16 different ways to code eye exams, thus it's critical to comprehend the meanings and applications of these fundamental codes. The 16 mandatory codes are divided into three groups: 2 HCPCS "S" codes (S062X), 4 ophthalmic visit codes, and 10 assessment and management (E/M) numbers (992XX) (920XX). There are three common coding sets used in optometry.

- The majority of procedures use CPT codes.
- The Health Care Procedural System for all non-CPT covered operations
- The ICD-10 diagnosis codes
