**imperialism** The practice of strong countries taking economic, political, and military power over weaker countries

**Alfred T. Mahan** American imperialist and admiral who urged the United States to build up its navy and take colonies overseas

**Pearl Harbor** Naval port in Hawaii

**Sanford B. Dole** American businessman who became president of the new government of Hawaii after the queen was pushed out.

## American Expansionism

(pages 342–344)

### *Why did Americans support imperialism?*

In 1893, **Queen Liliuokalani** of Hawaii gave up her throne. Hawaii was about to be taken over by the United States.

By the 1880s, many American leaders thought the United States should establish colonies overseas. This idea was called **imperialism**—the policy in which stronger nations extend economic, political or military control over weaker territories. European countries had competed for territory all over the world. Most Americans gradually accepted the idea of overseas expansion.

Three factors fueled American imperialism: desire for military strength, thirst for new markets, and a belief in the superiority of American culture.

Admiral **Alfred T. Mahan** of the U.S. Navy supported growing American naval power so the U.S. could compete with other nations. The U.S. built such modern battleships as the *Maine* and the *Oregon*. The new ships made the U.S. the world's largest naval power.

By the late 1800s, *technology* had changed American farms and factories. They produced more than Americans could consume. So the U.S. needed foreign trade. American businesses needed markets for their products and raw materials for their factories.

prerogatives to national leaders and a cosmopolitan human rights paradigm offer criteria for war that are insufficient in principle and dangerous in practice Drawing on a plurality of moral considerations the book recommends a modified legalist national defense paradigm which includes an atrocity threshold for humanitarian intervention and a legitimate authorization requirement The plausibility of this restrictive framework is applied to case studies including the long wars in Iraq and Afghanistan ongoing targeted killing and possible interventions in Syria and elsewhere Various arguments which seek to loosen the criteria for war are also systematically analyzed and criticized This book will be of much interest to students of just war theory military history ethics political philosophy and international relations *Race, Reality, and Realpolitik* Jeffrey Sommers,2015-11-11 The year 2015 marked the centennial of the 1915 United States occupation of Haiti and Haiti s resistance to that signal event in its history This study surveys the issues of economics race and realpolitik embedded in the political economy of U S interactions with Haiti that resulted in occupation It then interrogates what constitutes the state as it pertains to foreign policy along with an inspection of who benefits from empire This approach eschews tired dichotomies of whether or not the United States as a whole materially benefited from empire to instead simply look at who individually gained and what were the capacities of these beneficiaries to craft policy Next it delivers insights derived from a forensic analysis of Woodrow Wilson s perception of race and his decision to intervene in Haiti Attitudes enabling United States military leaders to implement a policy of occupation are provided through a study of Admiral William Caperton s role in the intervention The focus then telescopes out to inspect the role played by the press especially as booster for commercial opportunities In short the project answers the questions of why who and how American empire was undertaken through the case study of Haiti and its occupation in 1915 *The American Friend* ,1929 **1967 Annual Supplement** John B.
