Women and Buddhist Philosophy Jin Y. Park, 2017-02-28 Why and how do women engage with Buddhism and philosophy The present volume aims to answer these questions by examining the life and philosophy of a Korean Zen Buddhist nun Kim Iry p 1896 1971 The daughter of a pastor Iry p began questioning Christian doctrine as a teenager In a few years she became increasingly involved in women s movements in Korea speaking against society s control of female sexuality and demanding sexual freedom and free divorce for women While in her late twenties an existential turn in her thinking led Iry p to Buddhism she eventually joined a monastery and went on to become a leading figure in the female monastic community until her death After taking the tonsure Iry p followed the advice of her teacher and stopped publishing for more than two decades She returned to the world of letters in her sixties using her strong distinctive voice to address fundamental questions on the scope of identity the meaning of being human and the value of existence In her writing she frequently adopted an autobiographical style that combined her experiences with Buddhist teachings Through a close analysis of Iry p s story Buddhist philosophy and practice in connection with East Asian new women s movements and continental philosophy this volume offers a creative interpretation of Buddhism as both a philosophy and a religion actively engaged with lives as they are lived It presents a fascinating narrative on how women connect with the world whether through social issues such as gender inequality a Buddhist worldview or existential debates on human existence and provides readers with a new way of philosophizing that is transformative and deeply connected with everyday life *Women and Buddhist Philosophy Engaging Zen Master Kim Iry p* will be of primary interest to scholars and students of Buddhism Buddhist and comparative philosophy and gender and Korean studies

One of the Trinity Has Suffered: Balthasar's Theology of Divine Suffering in Dialogue Joshua R. Brotherton, 2020-01-01 Hans Urs von Balthasar s discourse on the descent of Christ into hell and its implications for the Triune God have been disputed for half a century One of the Trinity has Suffered evaluates and revises von Balthasar s theology of divine suffering in a way that interacts with and significantly enriches contemporary Catholic theology In this book Joshua R Brotherton engages twentieth century Thomistic theology as well as the thought of Pope Emeritus Benedict XVI Joseph Ratzinger and Pope St John Paul II Drawing from the vast secondary literature on von Balthasar Brotherton offers a balanced assessment of his work on the topic of divine suffering both critical and appreciative Recognizing von Balthasar s laudable attempt to integrate mystical spirituality and systematic theology Brotherton seeks to distinguish valid insights from confused mixtures of metaphorical meta symbolic and philosophical metaphysical discourse on God particularly with respect to the classical problem of how the Creator who willed to become incarnate may be said to suffer Truly One of the Trinity has suffered and yet this mystery of faith must be carefully explained and understood in conformity with sustained Catholic reflection on divine immutability and simplicity the dual nature and unique personhood of Christ the Trinity of divine subsistent relations the freedom of God in creating and becoming man the

analogy of being the problem of evil and the immensity and infinite value of Christ's redemptive suffering **The Cornhill Magazine** William Makepeace Thackeray, 1872 *The Cornhill Magazine*, 1872 **Making the Invisible Real** Catherine Hartmann, 2025-05-09 How can a person learn to see a mountain as a divine mandala especially when to the ordinary eye the mountain looks like a pile of rocks and snow This is the challenge that the Tibetan pilgrimage tradition poses to pilgrims who are told to overcome their ordinary perception to see the hidden reality of the holy mountain Drawing on multiple genres of Tibetan literature from the 13th to 20th centuries including foundational narratives of holy places polemical debates about the value of pilgrimage written guides to holy sites advice texts and personal diaries this book investigates how the pilgrimage tradition tries to transform pilgrims' perception so that they might experience the wondrous sacred landscape as real and materially present Catherine Anne Hartmann argues that the pilgrimage tradition does not simply assume that pilgrims experience this sacred landscape as real but instead leads pilgrims to adopt deliberate practices of seeing ways of looking at and interacting with the world that shape their experience of the holy mountain Making the Invisible Real explores two ways of seeing the pilgrim's ordinary perception of the world and the fantastic vision believed to lie beyond this ordinary perception As pilgrims move through the holy place they move back and forth between these two ways of seeing weaving the ordinary perceived world and extraordinary imagined world together into a single experience Hartmann shows us how seemingly fantastical religious worldviews are not simply believed or taken for granted but actively constructed and reconstructed for new generations of practitioners Fractal Dimensions of Networks Eric Rosenberg, 2020-07-07 Current interest in fractal dimensions of networks is the result of more than a century of previous research on dimensions Fractal Dimensions of Networks ties the theory and methods for computing fractal dimensions of networks to the classic theory of dimensions of geometric objects The goal of the book is to provide a unified treatment of fractal dimensions of sets and networks Since almost all of the major concepts in fractal dimensions originated in the study of sets the book achieves this goal by first clearly presenting with an abundance of examples and illustrations the theory and algorithms for sets and then showing how the theory and algorithms have been applied to networks Thus the book presents the classical theory and algorithms for the box counting dimension for sets and then presents the box counting dimension for networks All the major fractal dimensions are studied e.g. the correlation dimension the information dimension the Hausdorff dimension the multifractal spectrum as well as many lesser known dimensions Algorithm descriptions are accompanied by worked examples many applications of the methods are presented and many exercises ranging in difficulty from easy to research level are included **Transatlantic Magazine**, 1872
