The Evaluation and Measurement of Library Services Joseph R. Matthews, 2017-10-27 This guide provides library directors, managers and administrators in all types of libraries with complete and up to date instructions on how to evaluate library services in order to improve them. It's a fact today's libraries must evaluate their services in order to find ways to better serve patrons and prove their value to their communities. In this greatly updated and expanded edition of Matthews' seminal text you'll discover a breadth of tools that can be used to evaluate any library service including newer tools designed to measure customer and patron outcomes. The book offers practical advice backed by solid research on virtually every aspect of evaluation including quantitative and qualitative tools, data analysis and specific recommendations for measuring individual services such as technical services and reference and interlibrary loan. New chapters give readers effective ways to evaluate critical aspects of their libraries such as automated systems, physical space, staff performance, management frameworks, eBooks, social media and information literacy. The author explains how broader and more robust adoption of evaluation techniques will help library managers combine traditional internal measurements such as circulation and reference transactions with more customer-centric metrics that reflect how well patrons feel they are served and how satisfied they are with the library. By applying this comprehensive strategy, readers will gain the ability to form a truer picture of their library's value to its stakeholders and patrons.
