inventor of cybernetics and Marshall McLuhan inspired the counterculture radicals in the sixties and seventies and traces how their pioneering idealistic and theoretical work laid the groundwork for a system whose central idea is bringing about direct communication between peers outside the reach of authority Harkin explores what it means to be in the loop and our obsession with instant access to information and how it is shared over networks and considers what has been lost and what has been gained Are we more connected than ever before or more isolated Have our thinking processes been forever altered Is the democratic nature of the net slowly being eroded by corporate interests Or as once hoped will the net enable the awakening of a new kind of global consciousness
