

Capítulo 8 Mantenimiento Periódico

Con el fin de garantizar un rendimiento continuo y seguro del equipo, se debe establecer un programa de mantenimiento periódico. Es responsabilidad del propietario proporcionar o coordinar este servicio.

Existen dos niveles de mantenimiento, el primero consiste en tareas que realiza el usuario/operador, y el segundo son aquellas tareas que debe realizar el personal calificado del servicio de rayos-X.

El primer servicio de mantenimiento periódico debe realizarse seis (6) meses después de la instalación y los servicios posteriores a intervalos de doce (12) meses.

El fabricante asume la responsabilidad de tener partes de repuesto disponibles para este equipo durante al menos cinco (5) años a partir de la fecha de fabricación.

8.1 Tareas del Operador

8.1.1 Mantenimiento de las Baterías

Tareas para un correcto mantenimiento de las baterías:

1. Recargue las baterías durante al menos 30 minutos al comienzo del día antes de usar la unidad.
2. Recargue las baterías durante al menos 30 minutos al final del día después de usar la unidad.
3. Recargue completamente las baterías cuando la unidad se desconecte por más de 3 semanas.
4. Recargue completamente las baterías cuando la unidad se haya desconectado por más de 3 semanas.
5. Mantenga la unidad conectada a la red siempre que sea posible (un máximo de 48 horas) para mantener las baterías en el nivel de mantenimiento flotante. Esto aumenta su vida.
6. No permita que las baterías se descarguen en profundidad, ya que perderán capacidad de almacenamiento y nunca podrán recuperar el 100% de su capacidad original.

NOTA: Para obtener más información, consulte "Indicadores de Nivel de Carga de la Batería" en el Capítulo 3.2 y "Capacidad de la Batería para el Generador y los Motores" en el Capítulo 9.1.
