Reframing Social Citizenship Peter Taylor-Gooby, 2010-11-04 Throughout the world governments are restructuring social and welfare provision to give a stronger role to opportunity aspiration and individual responsibility and to competition markets and consumer choice This approach centres on a logic of individual rational action people are the best judges of what serves their own interests and government should give them as much freedom of choice as possible The UK has gone further than any other major European country in reform and provides a useful object lesson This book analyses the pressures on social citizenship from changes in work and the family political actors population ageing and the processes within government in the relentless international process of globalization that have shaped the response It examines the various social science approaches to agency and argues that the logic of rational action is able to explain how reciprocity arises and is sustained but offers a weak foundation for social inclusion and social trust It will only sustain part of the welfare state A detailed assessment of empirical evidence shows how the outcomes of the new policy framework correspond to its theoretical strengths and limitations Reforms have achieved considerable success in delivering mass services efficiently They are much less successful in redistributing to more vulnerable low income groups and in maintaining public trust in the structure of provision The risk is that mistrustful and disquieted voters may be unwilling to support high spending on health care pensions and other benefits at a time when they are most needed In short the reform programme was undertaken for excellent reasons in a difficult international context but risks throwing the baby out with the bathwater

Public Services and Financial Austerity R. Latham,M. Prowle,2011-12-12 The authors suggest that some of the problems of the public sector are self inflicted and that current policies may only deliver partial success at a price we cannot afford It proposes a radical alternative and discusses practical ways it could be implemented It also explores the threats and opportunities that such an approach might face

Universities and Regions Michael Shattock,Aniko Horvath,2023-04-06 This book explores the impact of localities and regions on universities and shows how the diversity of the higher education landscape is critically affected by the geophysical character of regions and their differentiated economies and cultures regional inequalities bear heavily on universities strategy making A study of the interrelationship between higher and further education argues that from a regional perspective a change to a tertiary education system in England following Wales would create the conditions for better local and regional coordination Universities make a significant contribution to levelling up through technology transfer and the creation of innovation hubs but the contribution of locally or regionally based students who on graduation return to disadvantaged communities rather than seek employment elsewhere should be recognised also as a longer term step to redressing regional inequality The book argues strongly that the time has come to decentralise the governance of a re aligned tertiary system to regions and identifies the move to create metro mayors and combined authorities as providing the appropriate vehicle to release new initiative from regional sources It cites the success of decentralisation to Scotland and Wales as offering relevant models for scrutiny The authors draw on 12 UK widely differentiated university case studies a survey of further education and a study of three continental European comparators Germany Ireland and Norway to develop the argument
