

NON-STANDARDIZED FIELD SOBRIETY TESTS

COUNTING BACKWARDS TEST

Upon instruction from the police officer, you will be directed to stand with your arms at your sides and to count backward from a specific number. The police officer may ask you to count in reverse order from a completely random set of numbers, such as counting backward from the number 68 to the number 32. During the test, the police officer will look for signs of impairment, including the inability to count, starting or stopping the test too early, and failing to follow the test instructions.

PORTABLE BREATH TEST

A portable breath test or preliminary breath test (PBT) is a device law enforcement officers use to detect the presence of alcohol in individuals suspected of driving while impaired. The PBT is often used in addition to other FSTs to establish probable cause for arrest for DUI. A PBT will often produce an inaccurate test result if the driver has residual alcohol in their mouth from mouthwash or cough syrup. A PBT is not calibrated or tested for accuracy. Therefore, the test result is not admissible as evidence in a DUI trial.

FINGER COUNT TEST

The police officer will ask you to touch the tip of your thumb in turn to the end of each finger on the same hand while simultaneously counting from 1 to 4. You will then be required to simultaneously reverse direction on your fingers while counting from 4 to 1. During the test, the police officer will look for signs of impairment, including the inability to follow the instructions, the failure to touch one's fingers as instructed, the inability to perform the correct number of sets, and stopping the test before being required to do so.

ALPHABET TEST

You will be asked by the police officer to recite part of the alphabet from the beginning, starting at a letter other than the letter A and stopping at a letter other than the letter Z. During the test, the police officer will look for signs of impairment, including slurred speech, an inability to correctly recite the alphabet, the starting of the test too soon and a failure to follow directions.

FINGER-TO-NOSE TEST

You will be instructed by the police officer to bring the tip of your index finger to the end of your nose. At the same time, your eyes are closed, and your head is tilted slightly back. You must attempt to touch the tip of your nose 3 times with each hand. During the test, the police officer will look for signs of impairment, including the driver's inability to follow the instructions, swaying, tremors, the inability to hold the finger directly on the tip of the nose, and poor depth perception.

ROMBERG BALANCE TEST

The police will instruct you to stand with your feet together while leaning your head back and closing your eyes with your arms at your side. You will be asked to hold this position for approximately 30 seconds. During the test, the police officer will look for signs of impairment, including swaying, eyelid tremors, and an inability to accurately estimate 30 seconds.
