Rugman, 2005-01-06 Although many firms label themselves global very few can back this up with truly global sales and operations In *The Regional Multinationals* Alan Rugman examines first hand data from multinationals and finds that most multinationals are strongly regional with international operations in their home regions of North America the US or Asia Only a tiny proportion of the world s top 500 companies actually sell the same product and deliver the same services around the world Rugman exposes the facts behind the popular myths of doing business globally explores a variety of regional models and offers an authoritative agenda for future business strategy *The Regional Multinationals* is the essential resource for all academics and students in International Business Organization and Strategic Management as well as those with an interest in finding out how multinationals really work in practice and how future strategy must respond **Global Sport Business**

Hans Westerbeek, 2013-09-13 *Global Sport Business* The Community Impact of Commercial Sport involves a range of pressing issues that come with the arrival of sport as a commodity in the world economy It can be argued that throughout the past two centuries sport has always been recognized as both a frivolous pursuit of spending leisure time with friends and family and as an activity that has substantial commercial value to be mined by entrepreneurs However only during the most recent wave of globalization spurred by technological advancements that have led to achieving global reach in regard to potential customers has sport entered a global marketplace that offers tremendous financial rewards for those who manage to control international sport organizations and events In this book global sport business is viewed from a number of different perspectives including a value chain approach to describing the sport industry the ever increasing impact of the international media on sport business how globalization influences the style of sport management how social capital can be generated through sport business and the emergence of social sport business Overall the different contributors to the book reflect on how sport s global and as such commercial attractiveness can and often will impact locally on communities of people and individuals This book was published as a special issue of *Sport in Society* *Globaloney* Michael Veseth, 2005 Veseth

separates rhetoric from reality by taking close ups of classic globalization images and comparing them with unexpected alternative visions
